- General Registry on Cancer in the Poitou-Charentes Region (Certified 2013-2015 Registry)

Head :Ingrand Pierre, Cancer Epidemiology Unit

Last update : 07/05/2016 Version : 1 ID : 200		
General		
Identification		
Detailed name	General Registry on Cancer in the Poitou-Charentes Region (Certified 2013-2015 Registry)	
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CNIL 907303 (15/02/2008)	
General Aspects		
Medical area	Cancer research	
Keywords	region, registry, public health	
Scientific investigator(s) (Contact)		
Name of the director	Ingrand	
Surname	Pierre	
Address	6 rue de la Milétrie BP 199, 86034 POITIERS CEDEX	
Phone	+33 (0)5 49 45 43 45	
Email	pierre.ingrand@univ-poitiers.fr	
Unit	Cancer Epidemiology Unit	
Organization	Faculty of Medicine and Pharmacy at Poitiers Teaching Department	
Collaborations		
Funding		
Funding status	Public	
Details	InCA	

Governance of the database Sponsor(s) or organisation(s) Faculté de Médecine et de Pharmacie de Poitiers responsible Organisation status **Public** Additional contact Main features Type of database Type of database Morbidity registers Additional information regarding Subjects who met the required enrolment criteria sample selection. were selected. Cases are recorded by crossreferencing several identification sources. All heads of the anatomic cytopathology (ACP) laboratory or Health Insurance Fund (AMA) were identified. Those in charge of the Medical Information Departments (MIDs) were informed through regular meetings held at CoRIM (Regional College of Medical Information). An approval request was sent to the directors of each public or private healthcare establishment in the region. Emphasis was placed on the management of computer platforms and on editing, validating and implementing collection, verification and recording procedures for cases. Data are submitted to cancer registries every six months in encrypted electronic format (PGP doubleencryption software). Data are aggregated at each new submission for that year to account for

Database objective

Main objective

Register aims in terms of public healthcare (monitoring, assessment):

from previous submissions.

possible changes involving one or more records

The aim of the register is to provide benchmarks for describing the dynamics of cancer progression (distribution, progression and impact of the disease according to the geography and demographics of the population) and to become involved in the evaluation of screening and prevention (by assessing the effectiveness of the programmes in place) and care assessment (analysing treatment paths used by patients; factors that determine diagnostic care management and distribution of good practice recommendations). It shall play a specialist role in aiding the assessment of public policies by the Regional Health Agency (ARS), in

collaboration with other regional organisations (Poitou-Charentes Cancer Network, Regional Health Observatory and screening facilities). It shall participate in producing national (FRANCIM) and international (IARC) statistics. Register aims in terms of research: Two research areas are preferred for continuing research conducted by the Public Health Team in Poitiers. 1) Assessing factors that affect access to screening facilities (access to screening facilities for sibshipbased index cases) and assessing factors affecting access to care (patient satisfaction; access to technical surgical platforms and waiting periods for radiotherapy). 2) Automated classification of textual information contained in electronic anatomic pathology and cytopathology reports (collaboration with University of Rennes 1).

Inclusion criteria

All cases of malignant invasive tumours (haematologic malignancies and solid tumours excluding basal cell carcinoma of the skin); in situ tumours; borderline ovarian tumours; as well as benign tumours or tumours with unpredictable progression in the brain and bladder. Advanced colorectal adenomas will be passively recorded.

Population	type
------------	------

Age

Newborns (birth to 28 days)
Infant (28 days to 2 years)
Early childhood (2 to 5 years)
Childhood (6 to 13 years)
Adolescence (13 to 18 years)
Adulthood (19 to 24 years)
Adulthood (25 to 44 years)

Adulthood (45 to 64 years) Elderly (65 to 79 years)

Great age (80 years and more)

Population covered Sick population

Gender Male Woman

Geography area Regional

French regions covered by the Aquitaine Limousin Poitou-Charentes database

Detail of the geography area Poitou-Charentes region, i.e. four departments: 16 Charente; 17 Charente-Maritime; 79 Deux-Sèvres

and 86 Vienne.
