Unit Santé publique France

Organization	Santé publique France
Collaborations	
Funding	
Funding status	Public
Details	National Research Agency against AIDS and Viral Hepatitis (ANRS), Direction Générale de la Santé, Santé publique France
<b>Governance of the database</b>	
Sponsor(s) or organisation(s) responsible	National Research Agency against AIDS and Viral Hepatitis (ANRS)
Organisation status	Public
<b>Additional contact</b>	
<b>Main features</b>	
<b>Type of database</b>	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is is made on the basis of:	Another treatment or procedure
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Three groups of migrants from Sub-Saharan Africa: a group living with HIV, a group living with chronic hepatitis B and a group who has neither of these pathologies Cf : <a href="http://www.parcours-sante-migration.com/IMG/pdf/parcours_protocol-english_1910.pdf">http://www.parcours-sante-migration.com/IMG/pdf/parcours_protocol-english_1910.pdf</a>
<b>Database objective</b>	
Main objective	The objective of the Parcours study is to understand, among sub-Saharan African migrants,

how social and individual factors combine in the course of migration and settlement in France, and increase or decrease the risk of infection, improve or reduce access to prevention and care, optimize or restrict the effectiveness of care for both HIV and hepatitis B diseases.

#### Inclusion criteria

- For the 3 groups:
  - o Be born in a Sub-Saharan African country and with Sub-Saharan African citizenship at birth,
  - o Be aged 18 years or older,
  - o Followed in the service for one's own health.
  
- For the HIV group:
  - o To have been diagnosed for HIV more than 3 months ago, regardless of co-infections
  
- For the hepatitis B group:
  - o To have been diagnosed AgHBs+ more than 3 months ago and not be HIV co-infected
  
- For the primary care group:
  - o Not be known by the consulting physician as infected by HIV or HBV.

#### Population type

Age  
Adulthood (19 to 24 years)  
Adulthood (25 to 44 years)  
Adulthood (45 to 64 years)

Population covered  
General population

#### Pathology

Gender  
Male  
Woman

Geography area  
Regional

French regions covered by the database  
Île-de-France

Detail of the geography area  
Île-de-France

#### Data collection

##### Dates

Date of first collection (YYYY or MM/YYYY)  
2012

Date of last collection (YYYY or MM/YYYY)  
2013

MM/YYYY)

## Size of the database

Size of the database (number of individuals) [1000-10 000[ individuals

Details of the number of individuals 2468

## Data

Database activity Data collection completed

Type of data collected Clinical data  
Declarative data

Clinical data (detail) Direct physical measures

Declarative data (detail) Face to face interview

Details of collected declarative data Course of migration, socioeconomic conditions, sexual and reproductive life history, screening and care history

Presence of a biobank No

Health parameters studied Health event/morbidity  
Health care consumption and services  
Quality of life/health perception  
Others

Care consumption (detail) Hospitalization

Other (detail) Cf : [http://www.parcours-sante-migration.com/IMG/pdf/parcours\\_protocol-english\\_1910.pdf](http://www.parcours-sante-migration.com/IMG/pdf/parcours_protocol-english_1910.pdf)

## Procedures

Data collection method Life-event history questionnaire administered face-to-face by a specialized interviewer

Participant monitoring No

Followed pathology

Links to administrative sources No
