Main features

Type of database

Type of database	Study databases
------------------	-----------------

Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
---------------------------	--

Database recruitment is carried out by an intermediary	A population file
--	-------------------

Database recruitment is carried out as part of an interventional study	No
--	----

Additional information regarding sample selection.	Random selection from the Lorraine labour force
--	---

Database objective

Main objective	To study the relationship between work, lifestyle/life conditions and workplace accidents
----------------	---

Inclusion criteria	Random selection from the Lorraine labour force
Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years)
Population covered	General population
Pathology	
Gender	Male Woman
Geography area	Regional
French regions covered by the database	Alsace Champagne-Ardenne Lorraine
Detail of the geography area	Lorraine
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2006
Date of last collection (YYYY or MM/YYYY)	2006
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	2888
Data	
Database activity	Data collection completed
Type of data collected	Declarative data
Declarative data (detail)	Paper self-questionnaire
Details of collected declarative data	Age, height, weight, employment, alcohol, tobacco, diseases diagnosed by a physician, consumption of sleeping pills, handicap, workplace accident (during the last two years), physical demands of the job

Presence of a biobank	No
Health parameters studied	Health event/morbidity
Procedures	
Data collection method	Questionnaires sent by e-mail (date of birth, weight, height, work by INSEE classification, job applications, consumption habits), 3 questionnaires at one-month intervals
Participant monitoring	No
Followed pathology	
Links to administrative sources	No
Promotion and access	
Promotion	
Link to the document	http://www.ncbi.nlm.nih.gov/pubmed/19233831
Access	
Terms of data access (charter for data provision, format of data, availability delay)	Contact the scientist in charge
Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
