Population type	
Age	Adolescence (13 to 18 years)
Population covered	General population
Pathology	
Gender	Male Woman
Geography area	Departmental
French regions covered by the database	Aquitaine Limousin Poitou-Charentes
Detail of the geography area	Charente-Maritime
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	1998
Date of last collection (YYYY or MM/YYYY)	1999
Size of the database	
Size of the database (number of individuals)	[1000-10 000[ individuals
Details of the number of individuals	4340
Data	
Database activity	Data collection completed
Type of data collected	Declarative data
Declarative data (detail)	Paper self-questionnaire
Details of collected declarative data	The students completed the questionnaire at their schools in private rooms.
Presence of a biobank	No
Health parameters studied	Health event/morbidity Quality of life/health perception

## Procedures

Data collection method	In schools.
------------------------	-------------

Participant monitoring	No
------------------------	----

Followed pathology	
--------------------	--

Links to administrative sources	No
