

# PPGP - Paris Prevention in General Practice

Head :Rigal Laurent, Inserm U1018 - Centre de Recherche en Épidémiologie et Santé des Populations Team:  
Genre, Santé sexuelle et Reproductive

Last update : 10/20/2017 | Version : 1 | ID : 32383

General	
Identification	
Detailed name	Paris Prevention in General Practice
Sign or acronym	PPGP
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CNIL N° 904445
General Aspects	
Medical area	Cancer research Cardiology General practice Gynecology/ obstetrics Psychology and psychiatry
Health determinants	Addictions Lifestyle and behavior Social and psychosocial factors
Keywords	Inequality, general practitioner, prevention, screening
Scientific investigator(s) (Contact)	
Name of the director	Rigal
Surname	Laurent
Address	16 avenue Paul Vaillant Couturier 94807 Villejuif
Phone	+33 (0)1 45 21 24 37
Email	laurent.rigal@inserm.fr ; laurent.rigal@free.fr
Unit	Inserm U1018 - Centre de Recherche en Épidémiologie et Santé des Populations Team: Genre, Santé sexuelle et Reproductive

Organization	INSERM - Institut National de la Santé et de la Recherche
Collaborations	
Participation in projects, networks and consortia	No
Funding	
Funding status	Public
Details	Inserm - National Cashier for Salaried Worker Health Insurance - CNAMTS - French National Authority for Health (HAS) - Directorate for Research, Studies, Evaluation and Statistics (DREES) - Mission de la Recherche (MiRe) - Institut de Recherche en Santé Publique (IReSP) - Institut national de prévention et d'éducation pour la santé (Inpes) - Fondation de France
Governance of the database	
Sponsor(s) or organisation(s) responsible	INSERM - Institut National de la Santé et de la Recherche Médicale
Organisation status	Public
Presence of scientific or steering committees	Yes
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health care professionals
Additional information regarding sample selection.	The recruited patients are selected by their general practitioners participating in the study. The sample of physicians was established by random selection from the exhaustive list of the contact information of independent general practitioners practicing in 2004 in Paris and in the departments adjacent to it

Database objective	
Main objective	To analyse social inequalities in preventive practices in general medicine.
Inclusion criteria	<ul style="list-style-type: none"> <li>- hommes entre 35 et 64 ans pour la consommation de tabac et d'alcool</li> <li>- femmes entre 50 et 69 ans pour le dépistage des cancers gynécologiques</li> </ul>
Population type	
Age	Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years)
Population covered	General population
Pathology	
Gender	Male Woman
Geography area	Regional
French regions covered by the database	Île-de-France
Detail of the geography area	Paris and the departments adjacent to it
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	12/2004
Date of last collection (YYYY or MM/YYYY)	10/2006
Size of the database	
Size of the database (number of individuals)	[1000-10 000[ individuals
Details of the number of individuals	4106
Data	
Database activity	Data collection completed

Type of data collected	Clinical data Declarative data Paraclinical data Biological data
Clinical data (detail)	Direct physical measures
Declarative data (detail)	Phone interview
Details of collected declarative data	The social and medical characteristics were collected bilaterally (mirror questionnaires) from patients by telephone (for the social characteristics) and from physicians by questions asked face-to-face by physician surveyors previously trained in administering the questionnaires. The physicians were interviewed in their offices and responded for each patient with the aid of their medical files.
Presence of a biobank	No
Health parameters studied	Health care consumption and services
Care consumption (detail)	Medical/paramedical consultation
<b>Procedures</b>	
Data collection method	Informations related to general practitioners and their patients participating in the study was collected using questionnaires
Participant monitoring	No
Followed pathology	
Links to administrative sources	No
<b>Promotion and access</b>
