Main features

Type of database

Type of database Study databases

Study databases (details) Not-repeated cross-sectional studies (except case control studies)

Database recruitment is carried out by an intermediary An administrative base or a register

Base or register (detail) List of those entitled to unemployment, minimum integration income (RMI) social services

Database recruitment is made on the basis of: Another treatment or procedure

Database recruitment is carried out as part of an interventional study No

Database objective

Main objective The purpose of this study is to describe the prevalence and treatment of arterial hypertension in a population that is precarious but has good social coverage and good access to the health care system

Inclusion criteria The study's inclusion criteria for defining precariousness were: receiving the minimum integration income (RMI) and/or unemployment and/or living exclusively on social and family services

Population type

Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years)
-----	--

Population covered	General population
--------------------	--------------------

Pathology

Gender	Male Woman
--------	---------------

Geography area	Local
----------------	-------

French regions covered by the database	Guadeloupe
--	------------

Detail of the geography area	Guadeloupe
------------------------------	------------

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)	2001
--	------

Date of last collection (YYYY or MM/YYYY)	2003
---	------

Size of the database

Size of the database (number of individuals)	[1000-10 000[individuals
--	---------------------------

Details of the number of individuals	2420
--------------------------------------	------

Data

Database activity	Data collection completed
-------------------	---------------------------

Type of data collected	Clinical data Declarative data
------------------------	-----------------------------------

Clinical data (detail)	Medical registration
------------------------	----------------------

Details of collected clinical data	Blood pressure, BMI
