- Cross-sectional study of workplace accidents, occupational illnesses and handicaps - 2007

Head :Guggemos Fabien, Employment Division

Last update : 10/20/2017 | Version : 1 | ID : 73105

General

Identification

Detailed name	Cross-sectional study of workplace accidents, occupational illnesses and handicaps - 2007
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	European regulation No. 341/2006

General Aspects

Medical area	Disability/handicap Occupational Medicine
Health determinants	Occupation
Keywords	accident, work, employment, handicap

Scientific investigator(s) (Contact)

Name of the director	Guggemos
Surname	Fabien
Phone	+33 (0)1 41 17 50 18
Email	fabien.guggemos@insee.fr
Unit	Employment Division
Organization	Insee

Collaborations

Participation in projects, networks and consortia	Yes
Details	European Project piloted by Eurostats

Funding

Funding status	Public
Details	Insee

Sponsor(s) or organisation(s) responsible	Insee
Organisation status	Public

Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A population file
Database recruitment is carried out as part of an interventional study	Yes
Details	Performed at individual level
Additional information regarding sample selection.	Sample consists of the 6th person leaving each quarter of the 2007 Employment survey. Only two individuals from the household are accepted for the survey, even if the household includes more than two people. The two individuals from the household who should be accepted for the survey are chosen randomly according to their month of birth and according to the month of the first day of the reference week.

Main objective	The first European objective of the survey is to find out the number of workplace accidents and the number of days of work lost due to these workplace accidents. The survey will also allow for the determination of the number of illnesses caused or aggravated by the job, as well as the number of work days lost due to these illnesses. The second European objective is to analyse the

differences in results according to:
- the characteristics of the employer (economic activity, size of the business, etc.)
- the characteristics of the salaried worker's job (professional status, profession, full-time, part-time, duration of career, etc.)
This supplemental set of questions is intended specifically to enable comparisons with the results of the 2002 ad hoc module on the employment of handicapped individuals, in order to be able to evaluate the effects of the "Equal rights, opportunities, participation and citizenship of handicapped individuals act" adopted in 2004. The set of questions is divided into three parts. Part A address health problems within the last twelve months.

Inclusion criteria	Individuals who are at least 15 years of age on 31 December 2007 and who are members or ordinary households.

Population type

Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	General population
Pathology	
Gender	Male Woman
Geography area	National
Detail of the geography area	France

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)	2007
Date of last collection (YYYY or MM/YYYY)	2007

Size of the database

Size of the database (number of	Greater than 20 000 individuals

individuals)	
Details of the number of individuals	39 572

Data

Database activity	Data collection completed
Type of data collected	Declarative data
Declarative data (detail)	Paper self-questionnaire
Details of collected declarative data	The set of questions is divided into three parts. Part A address health problems within the last twelve months. Submodule A1 is intended for individuals who do not have any illnesses or handicaps caused or aggravated by work, while submodule A2 addresses individuals who have one or more illnesses, one or more of which were caused or aggravated by work. Module B is dedicated to workplace accidents that have occurred within the last twelve months, for individuals who have worked during this period. Module C has to do with the specific jobs and administrative procedures for the recognition of an illness or handicap. Lastly, module D has to do with the risks at the surveyed individual's workplace. 37,392 individuals completed the survey.
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health event/mortality

Procedures

Data collection method	Computer-assisted personal interviewing (CAPI). A second on-site interview should be carried out; performing the second interview by telephone is not allowed. In this survey, proxies are not allowed except for in the case of individuals who are unable to respond.
Classifications used	WHO coding
Participant monitoring	No
Followed pathology	
Links to administrative sources	No

Access

Terms of data access (charter for data provision, format of data, availability delay)	The data may only be used for research purposes. Any commercial use is strictly prohibited. The "production and research" files are subject to specific rules for use and should be destroyed at the end of the research for which they have been shared. The data from 2006 were distributed by the Quetelet network. In this setting, the files are accessible free of charge for research purposes to French and foreign researchers, professor-researchers, doctoral students and master's degree students. Any commercial use is prohibited. You must create an account first to access the data files : http://www.reseau-quetelet.cnrs.fr/quetelet/quetelet.php).
Access to aggregated data	Free access
Access to individual data	Access on specific project only
