

# - Cross-sectional study on transitions from active life to retirement - 2006

Head :Guggemos Fabien, Employment Division

Last update : 10/20/2017 | Version : 1 | ID : 73107

General	
Identification	
Detailed name	Cross-sectional study on transitions from active life to retirement - 2006
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CNIL, European regulation No. 388/2005
General Aspects	
Medical area	General practice
Health determinants	Lifestyle and behavior Occupation Social and psychosocial factors
Keywords	retirement, transition, health, professional life
Scientific investigator(s) (Contact)	
Name of the director	Guggemos
Surname	Fabien
Phone	+33 (0)1 41 17 50 18
Email	fabien.guggemos@insee.fr
Unit	Employment Division
Organization	Insee
Collaborations	
Participation in projects, networks and consortia	Yes
Details	Ad hoc module of the Employment survey

Funding	
Funding status	Public
Details	Insee
Governance of the database	
Sponsor(s) or organisation(s) responsible	Insee
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A population file
Database recruitment is carried out as part of an interventional study	Yes
Additional information regarding sample selection.	Sample made up of the 6th completion of the Employment survey (residence questioned for the 6th and final time)
Database objective	
Main objective	<p>The first objective of this module is to compile an overview of the situation of the work-retirement transition. How is this transition made or how is it planned? Will the transition be made or will it be done directly from work to retirement? Have the individuals had or thought they would have a transition period (pre-retirement, transition to part-time)? The second objective pursued is the analysis of factors that may influence or have influenced this transition from work to retirement, as well as the determination of the factors that may postpone or that have postponed leaving the job market. These factors may be of different types: the general working conditions (planning of work schedules, better health conditions); other factors directly related to the job (training and obsolescence of</p>

skills); financial factors (financial incentives to stay in their job); personal factors (health, family reasons).

Inclusion criteria	Individuals from 50 to 69 years of age on 31/12/2006 (individuals born between 1937 and 1956) who live in an ordinary household and whose household has been questioned for the 6th and final time by the Employment survey (6th outgoing)
Population type	
Age	Adulthood (45 to 64 years) Elderly (65 to 79 years)
Population covered	General population
Pathology	
Gender	Male Woman
Geography area	National
Detail of the geography area	France
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2006
Date of last collection (YYYY or MM/YYYY)	2006
Size of the database	
Size of the database (number of individuals)	[10 000-20 000[ individuals
Details of the number of individuals	12 451
Data	
Database activity	Data collection completed
Type of data collected	Declarative data
Declarative data (detail)	Face to face interview

Details of collected declarative data	These general working conditions (planning of work schedules, better health conditions); other factors directly related to the job (training and obsolescence of skills); financial factors (financial incentives to stay in their job); personal factors (health, family reasons).
Presence of a biobank	No

Health parameters studied      Health event/mortality

## Procedures

Data collection method	Computer-assisted personal interviewing (CAPI)
Participant monitoring	No
Followed pathology	
Links to administrative sources	No

## Promotion and access

### Promotion

### Access

Terms of data access (charter for data provision, format of data, availability delay)

Available formats: The data are available in SAS, SPSS and STATA formats.

Confidentiality statement: To obtain the data, you must agree not to transfer the data, in any way, to a third party.

Special permissions: The "Production and Research" files (FPR) are subject to specific rules for use and should be destroyed at the end of the research for which they have been shared.

Restrictions for use: The data may only be used for research purposes. Any other use, commercial or otherwise, is strictly prohibited.

Reference requirement: The source of the data received must appear in the publications supported by these data (including footnotes, bibliographic references, table legends).

Submission requirement: In order to provide the producing organisations with essential information regarding the use of the archived resources, the data users are required to send the ADISP-CMH, if possible in electronic format, an abstract or a reprint of their publication(s), indicating which studies were used in an accompanying letter.

Conditions of access: Different access procedures according to the requesting party's institutional affiliation and status. In all cases, the approval of the request at the end of instruction leads to the signature of an individual agreement.

Liability disclaimer: The producer and sharer of the data are not responsible for interpretations or deductions made using the data.

Contact: ADISP-CMH = [diffusion.adisp@ens.fr](mailto:diffusion.adisp@ens.fr)
