Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Database objective	
Main objective	The association between precarious situations and degradation of the state of health is widely accepted and links have been described for morbidity and mortality, and risk behaviours. In this context, our study aims to find a link between

precarious situations, the quality of life experienced and the existence of mixed anxiety-depressive disorders

Inclusion criteria	Subject being seen at one of the 12 health centres included in the study. Insured subjects and beneficiaries of the general social security scheme, who have undergone a periodic health examination and are volunteering for the study
--------------------	--

Population type

Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
-----	---

Population covered	General population
--------------------	--------------------

Pathology

Gender	Male Woman
--------	---------------

Geography area	National
----------------	----------

Detail of the geography area	France
------------------------------	--------

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)	2000
--	------

Date of last collection (YYYY or MM/YYYY)	2000
---	------

Size of the database

Size of the database (number of individuals)	[1000-10 000[individuals
--	---------------------------

Details of the number of individuals	6 211
--------------------------------------	-------

Data

Database activity	Data collection completed
-------------------	---------------------------

Type of data collected	Declarative data
Declarative data (detail)	Paper self-questionnaire
Details of collected declarative data	sociodemographic elements, EPICES precariousness score, Duke Health Profile, Hospital anxiety and depression scale (HAD) test and collection of the consumption of psychotropic drugs
Presence of a biobank	No

Health parameters studied	Health event/morbidity Health care consumption and services
Care consumption (detail)	Medicines consumption

Procedures

Participant monitoring	No
Followed pathology	
Links to administrative sources	No

Promotion and access
