

- Cross-sectional study on prevalence and factors associated with sleep disorders in HIV-infected patients

Head :Allavena Clotilde

Last update : 10/12/2017 | Version : 2 | ID : 73237

General

Identification

Detailed name	Cross-sectional study on prevalence and factors associated with sleep disorders in HIV-infected patients
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CNIL

General Aspects

Medical area	Infectious diseases Psychology and psychiatry
Pathology (details)	HIV
Health determinants	Addictions Lifestyle and behavior Medicine Social and psychosocial factors

Scientific investigator(s) (Contact)

Name of the director	Allavena
Surname	Clotilde
Email	clotilde.allavena@chu-nantes.fr
Organization	CHU Hôtel-Dieu, Nantes

Collaborations

Funding

Funding status	Public
----------------	--------

Details	COREVIH Pays de la Loire

Governance of the database

Sponsor(s) or organisation(s) responsible COREVIH Pays de la Loire

Organisation status Public

Presence of scientific or steering committees Yes

Additional contact

Main features

Type of database

Type of database Study databases

Study databases (details) Not-repeated cross-sectional studies (except case control studies)

Database recruitment is carried out by an intermediary A selection of health institutions and services

Database recruitment is carried out as part of an interventional study No

Database objective

Main objective Evaluate the prevalence of sleep disorders in an adult population living with HIV (PLHIV) monitored on an outpatient basis.
Identify risk factors for sleep disorders related to HIV infection or antiretroviral therapy.

Inclusion criteria Adult patients infected with HIV going in for a routine visit at one of the 6 clinical centres participating in COREVIH Pays de la Loire (Nantes, Angers, La Roche sur Yon, Saint Nazaire, Le Mans, Laval).
Participant's consent.

Population type

Age Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)
Great age (80 years and more)

Population covered Sick population

Pathology	B20-B24 - Human immunodeficiency virus [HIV] disease
Gender	Male Woman
Geography area	Regional
French regions covered by the database	Pays de la Loire
Detail of the geography area	Pays de la Loire
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2012
Date of last collection (YYYY or MM/YYYY)	2013
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	1354
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data Biological data
Clinical data (detail)	Direct physical measures
Details of collected clinical data	Associated pathologies, treatments (including ARV) in progress
Declarative data (detail)	Paper self-questionnaire
Details of collected declarative data	Sleep disorders (Pittsburgh Sleep Quality Index (PSQI)), quality of life (WHO QOL HIV BREF questionnaire), depression (Beck depression Inventory (BDI)). Sociodemographic and lifestyle data.

Biological data (detail)	Nadir CD4, last CD4 and last viral load
Presence of a biobank	No
Health parameters studied	Health event/morbidity Quality of life/health perception

Procedures

Participant monitoring	No
Followed pathology	
Links to administrative sources	No
