General

Identification

Detailed name	Cross-sectional study of patients monitored in private practice, users of illegal active substances or medicines diverted from their therapeutic use or under substitution treatment for opioid dependence
Sign or acronym	OPEMA: Observation of drug dependence in outpatient medicine

General Aspects

Medical area	General practice
Health determinants	Addictions Iatrogenic Lifestyle and behavior Medicine
Keywords	pharmacoepidemiology / consumption of psychoactive substances / general practitioners

Scientific investigator(s) (Contact)

Name of the director	Thirion
Surname	Xavier
Email	xavier.thirion@ap-hm.fr
Unit	EA 3279
Organization	Centre associated with CEIP-Addictovigilance PACA-Corsica, Public Health Laboratory, Faculty of Medicine, Aix-Marseille Université

Name of the director	Orleans
Surname	Veronica
Unit	EA 3279
Organization	Centre associated with CEIP-Addictovigilance PACA-Corsica, Public Health Laboratory, Faculty of Medicine, Aix-Marseille Université

Name of the director	Miloudi
Surname	Samira
Unit	EA 3279
Organization	Centre associated with CEIP-Addictovigilance PACA-Corsica, Public Health Laboratory, Faculty of Medicine, Aix-Marseille Université

Name of the director	Frauger
Surname	Elisabeth
Phone	+33 (0)4 91 38 75 63
Email	elisabeth.frauger@ap-hm.fr
Organization	CEIP Marseille

Name of the director	Micallef
Surname	Joëlle
Phone	+33 (0)4 91 38 75 63
Email	joelle.micallef@ap-hm.fr
Organization	CEIP Marseille

Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health care professionals
Database recruitment is made on the basis of:	Another treatment or procedure
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	OPEMA is a cross-section national pharmacological epidemiological survey conducted by a network of general practitioners recruited and led by the CEIP
Database objective	
Main objective	Its main objective is to collect information on sociodemographic characteristics, consumption of products and the health status of patients in monitored in private practice, users of illegal active substances or medicines diverted from their therapeutic use or under substitution treatment for opioid dependence.
Inclusion criteria	Voluntary patients and consultants at a general practitioner's clinic recruited and led by the CEIP
Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	General population
Pathology	

Gender	Male Woman
Geography area	National
Detail of the geography area	France
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2008
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	418 (2008), 628 (2009), 1385 (2010), 1516 (2011)
Data	
Database activity	Current data collection
Type of data collected	Clinical data Administrative data
Clinical data (detail)	Direct physical measures
Details of collected clinical data	Health status and current consumption of psychoactive substances
Administrative data (detail)	Sociodemographic situation of the subjects
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health care consumption and services
Care consumption (detail)	Medicines consumption
Procedures	
Data collection method	By general practitioners
Participant monitoring	No
Followed pathology	
Links to administrative sources	No
