

ADDICTAQUI - Aquitaine Addiction Cohort: Trajectories of people with addiction (substances or behaviour) in contact with health-care system. Medical, neurobiological, sociological and psychological characteristics. Prospective multicentric, multidisciplinary study

Head :Auriacombe Marc, Addiction team, SANPSY CNRS USR 3413, Université de Bordeaux

Last update : 10/19/2017 | Version : 1 | ID : 73375

General	
Identification	
Detailed name	Aquitaine Addiction Cohort: Trajectories of people with addiction (substances or behaviour) in contact with health-care system. Medical, neurobiological, sociological and psychological characteristics. Prospective multicentric, multidisciplinary study
Sign or acronym	ADDICTAQUI
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CPP 10/01/2001 and 30/01/2008, CNIL 997082
General Aspects	
Medical area	Psychology and psychiatry
Pathology (details)	Addiction
Health determinants	Addictions Healthcare system and access to health care services Lifestyle and behavior Medicine Nutrition Occupation Others (specify)
Others (details)	Alcohol, Tobacco, Cannabis, Heroin, Behavioural Addictions
Keywords	Addiction
Scientific investigator(s) (Contact)	
Name of the director	Auriacombe

Surname	Marc
Address	Pole Addictologie Centre Hospitalier Charles Perrens 121 rue de la Béchade 33076 BORDEAUX
Phone	0556561738
Email	marc.auriacombe@u-bordeaux.fr
Unit	Addiction team, SANPSY CNRS USR 3413, Université de Bordeaux
Organization	Université de Bordeaux
Collaborations	
Participation in projects, networks and consortia	Yes
Details	Inclusion centers for this cohort study are the Pôle Addictologie of CH Charles Perrens Bordeaux - CHU de Bordeaux (Prof. M. Auriacombe) and Bizia, CH de la Côte Basque (Dr J.P. Daulouède)
Funding	
Funding status	Public
Details	Ministry of Research (Auriacombe, 94 V 0269), PHRC (Tignol, PHRC 1994-1999), PHRC (Auriacombe, PHRC 2000-2004) , PHRC (Auriacombe, PHRC 2006)
Governance of the database	
Sponsor(s) or organisation(s) responsible	Université de Bordeaux, CH Charles Perrens, CHU de Bordeaux
Organisation status	Public
Additional contact	
Name of the contact	SERRE
Surname	Fuschia
Address	Laboratory of Psychiatry - Addictology Unit Centre Hospitalier Charles Perrens 121 rue de la Béchade 33076 BORDEAUX

Phone	0556561738
Email	fuschia.serre@u-bordeaux.fr
Unit	Addiction team, SANPSY CNRS USR 3413, Université de Bordeaux
Organization	Université de Bordeaux
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is is made on the basis of:	Another treatment or procedure
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Participants are recruited among patient initiating treatment for addiction (alcohol, tobacco, substance abuse, gambling, other addictive behaviour without substance abuse)
Database objective	
Main objective	The main objective of this study is to assess the medium- and long-term impact of addiction treatment. This is a medium- and long-term impact study under naturalistic conditions. The study plan is a prospective, multicentric study that includes participants with substance addiction and/or behavioural addiction when they request treatment for their addiction. This impact is evaluated on different parameters in a multidimensional way, depending on the subjects (medical and biopsychosocial characteristics), the therapeutic frameworks and their organisation, or the general context, in order to determine the trajectories. We seek to understand these trajectories and predict them from multiple characteristics (medical, neurobiological, sociological, psychological). A secondary objective is to study the socio-cultural and psychopathological profiles of the subjects

according to the type of addiction they present at inclusion. We will try, in particular, to highlight similarities and differences depending on the type of addiction. Ultimately, it is a question of being able to intervene more effectively for prevention and therapeutics but also to gain a better understanding of the development of addictive behaviour and the choice of a preferential substance or behaviour.

Inclusion criteria	To be included in the cohort, subjects must meet the DSM-5 diagnostic criteria for substance-related and addictive disorders (substance or non-substance addiction). They should seek a treatment for their addiction and agree to participate in this study.
Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years)
Population covered	Sick population
Pathology	F10-F19 - Mental and behavioural disorders due to psychoactive substance use
Gender	Male Woman
Geography area	National
Detail of the geography area	Aquitaine
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	1994
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	2016: 3500 inclus
Data	
Database activity	Current data collection

Type of data collected	Declarative data Biological data
Declarative data (detail)	Paper self-questionnaire Face to face interview Phone interview
Details of collected declarative data	Questionnaires used: Addiction Severity Index, Mini International Neuropsychiatric Interview, etc.
Biological data (detail)	Urinary toxicity dosage
Presence of a biobank	No

Procedures

Participant monitoring	Yes
Details on monitoring of participants	at 3 months, 6 months, and then every 6 months regardless of the status of the subject in his/her treatment
Followed pathology	F10-F19 - Mental and behavioural disorders due to psychoactive substance use V - Mental and behavioural disorders

Links to administrative sources	No
