Unit HESPER

Organization Université de Lyon 1

Collaborations

Participation in projects, networks and consortia No

Funding

Funding status Public

Governance of the database

Sponsor(s) or organisation(s) responsible Hospices Civils de Lyon & Université de Lyon 1

Organisation status Public

Presence of scientific or steering committees Yes

Additional contact

Main features

Type of database

Type of database Study databases

Study databases (details) Not-repeated cross-sectional studies (except case control studies)

Database recruitment is carried out by an intermediary A selection of health care professionals
A selection of health institutions and services

Database recruitment is made on the basis of: Another treatment or procedure

Database recruitment is carried out as part of an interventional study No

Additional information regarding sample selection. General practices and multiprofessional health homes across the Auvergne-Rhône-Alpes French region

Database objective

| | |
|----------------|---|
| Main objective | To estimate and describe, during the epidemics, the temporal evolution of the following indicators in the patient list of the primary care facilities in the Auvergne-Rhône-Alpes French region: incidence of the clinically suspect COVID-19 cases, incidence of the biologically confirmed COVID-19 cases, clinical characteristics of these cases. |
|----------------|---|

| | |
|--------------------|---|
| Inclusion criteria | - Patient M/F - Suspect or confirmed COVID-19 case attending a general practice or a multiprofessional health home in the Auvergne-Rhône-Alpes French region |
|--------------------|---|

Population type

| | |
|-----|--|
| Age | Newborns (birth to 28 days) Infant (28 days to 2 years) Early childhood (2 to 5 years) Childhood (6 to 13 years) Adolescence (13 to 18 years) Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more) |
|-----|--|

| | |
|--------------------|-----------------|
| Population covered | Sick population |
|--------------------|-----------------|

| | |
|-----------|---|
| Pathology | I - Certain infectious and parasitic diseases |
|-----------|---|

| | |
|--------|---------------|
| Gender | Male Woman |
|--------|---------------|

| | |
|----------------|----------|
| Geography area | Regional |
|----------------|----------|

| | |
|--|----------------------|
| French regions covered by the database | Auvergne Rhône-Alpes |
|--|----------------------|

Data collection

Dates

| | |
|--|------|
| Date of first collection (YYYY or MM/YYYY) | 2020 |
|--|------|

| | |
|---|------|
| Date of last collection (YYYY or MM/YYYY) | 2020 |
|---|------|

Size of the database

| | |
|--|---------------------------|
| Size of the database (number of individuals) | [1000-10 000] individuals |
|--|---------------------------|

Data

Database activity Current data collection

Type of data collected Clinical data
Biological data
Administrative data

Clinical data (detail) Direct physical measures
Medical registration

Details of collected clinical data Context, risk factors, interview data, clinical examination, follow-up

Biological data (detail) COVID-19 test

Administrative data (detail) Sick leave

Presence of a biobank No

Health parameters studied Health event/morbidity

Procedures

Data collection method Questionnaire integrated in the medical software

Quality procedure(s) used Checking of the completeness of the questionnaire data

Participant monitoring No

Followed pathology

Links to administrative sources No

Promotion and access

Promotion

Access

Dedicated website https://www.soprac.fr/icap_website/view/2551

Presence of document that lists variables and coding procedures No

Terms of data access (charter for data provision, format of data, availability delay) On request, after results publication

Access to aggregated data Access on specific project only

Access to individual data

No access
