

CONFIMIDs - Evaluation of the impact of the lockdown and easing of restrictions on the management of patients with inflammatory disease and immune disorders followed up as part of the FHU IMMINEnt project (rheumatology, dermatology, internal medicine, pulmonology, gastroenterology and neurology)

Head :DEZOTEUX Frédéric, INSERM U1286 INFINITE

Last update : 05/05/2021 | Version : 1 | ID : 73487

General

Identification

Detailed name	Evaluation of the impact of the lockdown and easing of restrictions on the management of patients with inflammatory disease and immune disorders followed up as part of the FHU IMMINEnt project (rheumatology, dermatology, internal medicine, pulmonology, gastroenterology and neurology)
---------------	--

Sign or acronym	CONFIMIDs
-----------------	-----------

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	2020-A01596-33
--	----------------

General Aspects

Medical area	Dermatology, venereology Gastroenterology et hepatology Immunology Internal medicine Neurology Pneumology Rare diseases Rheumatology
--------------	---

Study in connection with Covid-19	Yes
-----------------------------------	-----

Health determinants	Healthcare system and access to health care services Lifestyle and behavior Occupation
---------------------	--

Scientific investigator(s) (Contact)

Name of the director	DEZOTEUX
----------------------	----------

Surname	Frédéric
Address	Rue Michel Polonovski
Phone	320444193
Unit	INSERM U1286 INFINITE
Organization	LILLE UNIVERSITY HOSPITAL

Collaborations

Participation in projects, networks and consortia	Yes
---	-----

Funding

Funding status	Public
----------------	--------

Governance of the database

Sponsor(s) or organisation(s) responsible	Lille University Hospital
---	---------------------------

Organisation status	Public
---------------------	--------

Presence of scientific or steering committees	No
---	----

Main features

Type of database

Type of database	Study databases
------------------	-----------------

Database recruitment is carried out by an intermediary	An administrative base or a register
--	--------------------------------------

Database recruitment is carried out as part of an interventional study	No
--	----

Database objective

Main objective	Estimate the frequency of patients, with chronic inflammatory disorders, followed up as part of the FHU IMMINEnt project (gastroenterology, rheumatology, dermatology, pulmonology, neurology, internal medicine), whose follow-up has
----------------	--

been affected by the lockdown and easing of restrictions.

Inclusion criteria	All adult patients followed up as part of the FHU project for: <ul style="list-style-type: none">- Chronic inflammatory bowel disease or IBD (Crohn's disease and ulcerative colitis),- Rheumatic disorders (rheumatoid arthritis and spondyloarthritis)- Multiple sclerosis- Asthma- Psoriasis- Atopic dermatitis- Systemic auto-immune disease (scleroderma and lupus)
Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	Sick population
Pathology	G00-G09 - Inflammatory diseases of the central nervous system
	M34 - Systemic sclerosis
	M32 - Systemic lupus erythematosus
	L40 - Psoriasis
	L20-L30 - Dermatitis and eczema
	J45 - Asthma
	M05-M14 - Inflammatory polyarthropathies
	J84 - Other interstitial pulmonary diseases
	K50 - Crohn disease [regional enteritis]
	K51 - Ulcerative colitis
	L95 - Vasculitis limited to skin, not elsewhere classified
Gender	Male Woman
