Population type

Age	Adolescence (13 to 18 years) Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years)
Population covered	General population
Pathology	
Gender	Male Woman
Geography area	National
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2020
Date of last collection (YYYY or MM/YYYY)	2021
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	approximately 1,560
Data	
Database activity	Current data collection
Type of data collected	Declarative data Biological data Administrative data
Declarative data (detail)	Face to face interview Phone interview
Details of collected declarative data	Questions on behaviour and lifestyle with regard to the coronavirus, personal protective measures in the workplace and on public transport when travelling to work
Biological data (detail)	COVID-19 serology tests
Administrative data (detail)	Gender, age, position,

Presence of a biobank	No
-----------------------	----

Health parameters studied	Health event/morbidity
---------------------------	------------------------

Procedures

Data collection method	Face-to-face data collection during an appointment, or telephone appointment
------------------------	--

Participant monitoring	Yes
------------------------	-----

Monitoring procedures	Monitoring by convocation of the participant
-----------------------	--

Details on monitoring of participants	2 follow-up appointments at M2 and M6 organised by the occupational health department (by invitation)
