

COV1APHP - Collection of blood samples from individuals having developed SARS CoV-2 infection

Head :Launay Odile

Last update : 06/20/2025 | Version : 2 | ID : 73506

General

Identification

Detailed name Collection of blood samples from individuals having developed SARS CoV-2 infection

Sign or acronym COV1APHP

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation ID-RCB: 2020-A00915-34

General Aspects

Medical area Infectious diseases

Study in connection with Covid-19 Yes

Pathology (details) Recovered SARS-CoV-2 infection

Scientific investigator(s) (Contact)

Name of the director Launay

Surname Odile

Address CIC 1417 Cochin-Pasteur
Hôpital Cochin, Bâtiment Lavoisier
27 Rue du Faubourg Saint-Jacques
75014 PARIS

Collaborations

Participation in projects, networks and consortia No

Funding

Governance of the database

Sponsor(s) or organisation(s) responsible	BIOMERIEUX
Organisation status	
Additional contact	
Name of the contact	PIGA
Surname	Nadia
Address	BioMérieux SA Immunoassays Research & Development Chemin de l'Orme 69280 MARCY L'ETOILE
Email	nadia.piga@biomerieux.com
Main features	
Type of database	
Type of database	Study databases
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is is made on the basis of:	Another treatment or procedure
Database recruitment is carried out as part of an interventional study	Yes
Details	Performed at individual level
Additional information regarding sample selection.	Individuals having developed SARS-CoV-2 infection
Database objective	
Main objective	This study aims to develop prototype tests for the in vitro diagnostic serology of SARS-CoV-2
Inclusion criteria	Healthcare personnel or patient, having recovered from COVID-19 Individuals having developed typical symptoms of SARS-CoV-2, with a result confirmed by a PCR laboratory test on a nasopharyngeal swab, and with a blood sample taken at least 10 days after onset of symptoms Adults Individuals having been duly informed and signed

the informed consent form
Affiliated with a French social security system

Population type

Age
Adolescence (13 to 18 years)
Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)
Great age (80 years and more)

Population covered General population

Pathology

Gender Male
Woman

Geography area Regional

French regions covered by the database Île-de-France

Detail of the geography area APHP institutions

Data collection

Dates

Date of first collection (YYYY or MM/YYYY) 2020

Date of last collection (YYYY or MM/YYYY) 2020

Size of the database

Size of the database (number of individuals) < 500 individuals

Details of the number of individuals 100

Data

Database activity Data collection completed

Type of data collected Clinical data
Administrative data

Details of collected clinical data Date of onset of COVID-19 symptoms, clinical

signs, name of confirmation PCR test, date of PCR test

Administrative data (detail)

Age, gender

Procedures

Data collection method

Data collection form (1 form per participant) completed by the CIC (clinical investigation center), scanned, then transferred to BioMérieux via a secure file-sharing platform (Coltshare)

Participant monitoring

Yes

Monitoring procedures

Monitoring by contact with the participant (mail, e-mail, telephone etc.)

Details on monitoring of participants

Contact 3 days (+/- 1 day) after the blood sample, to check that the venous puncture site is healthy

Links to administrative sources

No
