## Population type

Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
-----	---

Population covered	Sick population
--------------------	-----------------

Pathology	B99-B99 - Other infectious diseases
-----------	-------------------------------------

Gender	Male Woman
--------	---------------

Geography area	National
----------------	----------

## Data collection

### Dates

Date of first collection (YYYY or MM/YYYY)	2020
--	------

### Size of the database

Size of the database (number of individuals)	[500-1000[ individuals
--	------------------------

### Data

Database activity	Current data collection
-------------------	-------------------------

Type of data collected	Clinical data Paraclinical data Biological data
------------------------	---

Clinical data (detail)	Direct physical measures Medical registration
------------------------	--

Presence of a biobank	Yes
-----------------------	-----

Contents of biobank	Serum Plasma
---------------------	-----------------

### Procedures

Followed pathology	
--------------------	--
