- Forgoing care during the lockdown period due to the COVID-19 epidemic

Head :Douillet Delphine, MITOVASC

Last update : 05/05/2021 | Version : 1 | ID : 73989

General	
Identification	
Detailed name	Forgoing care during the lockdown period due to the COVID-19 epidemic
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CPP SUD EST VI - ID-RCB 2020-A01960-39
General Aspects	
Medical area	Emergency medicine
Study in connection with Covid- 19	Yes
Pathology (details)	Forgoing care
Health determinants	Healthcare system and access to health care services
Scientific investigator(s) (Contact)	
Name of the director	Douillet
Surname	Delphine
Address	4 rue Larrey
Unit	MITOVASC
Organization	Angers University Hospital
Collaborations	
Participation in projects, networks and consortia	No
Funding	

Funding status	Public
Details	No funding for this study.
Governance of the database	
Sponsor(s) or organisation(s) responsible	Angers University Hospital
Organisation status	Public
Presence of scientific or steering committees	No
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Descriptive, observational, prospective, two-centre study. Each patient attending an emergency department will be interviewed directly. Those agreeing to complete the questionnaire will attend an individual interview. An information letter on the study will be given to the patient before collecting their answers. The patient may, at any time, express their objection to this study, and their personal data will then be erased.
Database objective	
Main objective	Compare the rate of patients forgoing care during the lockdown period in France, in emergency facilities at Angers and Le Mans hospitals, with that observed during a previous study in 2017.
Inclusion criteria	All adult patients having attended the A&E department at Angers University Hospital and Le Mans Hospital, able and agreeing to complete the

questionnaires directly or with the assistance of a translator.

Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	General population
Pathology	
Gender	Male Woman Other
Geography area	National
Detail of the geography area	Angers and Le Mans
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2020
Date of last collection (YYYY or MM/YYYY)	2020
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	1800
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data Administrative data
Clinical data (detail)	Direct physical measures
Details of collected clinical data	forgoing care, impact of Covid on appointments

Declarative data (detail)	Paper self-questionnaire Face to face interview
Details of collected declarative data	Waiver of care, covid impact on consultation
Administrative data (detail)	lifestyle, professional activity
Presence of a biobank	No
Health parameters studied	Health care consumption and services
Care consumption (detail)	Medical/paramedical consultation
Procedures	
Data collection method	self-administered questionnaire or questionnaire administered by another person
Classifications used	not documented
Quality procedure(s) used	not documented
Participant monitoring	No
Followed pathology	
Links to administrative sources	No
Promotion and access	
Promotion	
Description	In progress
Access
