## LORHA - A Retrospective Study to Characterize Patients With HER2-positive Metastatic or Locally Advanced Breast Cancer, Treated by Herceptin® as 1st Line-therapy and Without Progression for at Least 3 Years Followed by a 1-year Prospective Study for Patients Still Alive

Head :Roche Medical Data Center

Last update : 08/23/2022 | Version : 1 | ID : 74136

General	
Identification	
Detailed name	A Retrospective Study to Characterize Patients With HER2-positive Metastatic or Locally Advanced Breast Cancer, Treated by Herceptin® as 1st Line- therapy and Without Progression for at Least 3 Years Followed by a 1-year Prospective Study for Patients Still Alive
Sign or acronym	LORHA
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	ML23001
General Aspects	
Medical area	Cancer research
Study in connection with Covid- 19	No
Pathology (details)	HER2-positive Metastatic or Locally Advanced Breast Cancer
Pathology (details) Health determinants	
	Breast Cancer Iatrogenic
Health determinants	Breast Cancer Iatrogenic Medicine
Health determinants Keywords Scientific investigator(s)	Breast Cancer Iatrogenic Medicine

Email	data_sharing_france@roche.com
Organization	Roche SAS
Collaborations	
Participation in projects, networks and consortia	No
Funding	
Funding status	Private
Governance of the database	
Sponsor(s) or organisation(s) responsible	Roche SAS
Organisation status	Private
Presence of scientific or steering committees	Yes

	cancer who had received treatment with Herceptin (trastuzumab) in 1st line and who were without progression for at least three years.
	<ul> <li>Secondary objectives:</li> <li>The secondary objectives of this study were to describe:</li> <li>The progression-free survival, time to progression and patients overall survival;</li> <li>Modalities of use of trastuzumab, the duration of treatment and the reasons leading to treatment discontinuation;</li> <li>Antineoplastic treatments in combination with trastuzumab and after discontinuation of trastuzumab treatment;</li> <li>Relevant biological tumor markers;</li> <li>The safety of trastuzumab treatment.</li> </ul>
Inclusion criteria	<ul> <li>Inclusion criteria:</li> <li>Woman &gt;= 18 years;</li> <li>With HER2-positive metastatic breast cancer or locally-advanced breast cancer;</li> <li>Treated with trastuzumab as first-line therapy;</li> <li>Without progression for at least 3 years after initiation of trastuzumab treatment;</li> <li>Alive or not alive, and treated or not treated with trastuzumab at the time of inclusion;</li> <li>For patients alive at the time of inclusion:</li> <li>Having been informed orally and in writing about the study and having given their written consent to the automatic processing of her personal data and their consultation by a duly authorized third party;</li> <li>For the patients who accepted the centralized histological analysis of their primitive tumor, a written consent.</li> </ul>
Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	Sick population
Pathology	D05 - Carcinoma in situ of breast
Gender	Woman

Geography area	National
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2011
Date of last collection (YYYY or MM/YYYY)	2012
Size of the database	
Size of the database (number of individuals)	< 500 individuals
Details of the number of individuals	160
Data	
Database activity	Data collection completed
Type of data collected	Clinical data
Clinical data (detail)	Medical registration
Details of collected clinical data	evaluation/inclusion criteria - initial breast cancer diagnosis - neo-adjuvant treatments - adjuvant treatments - entry in metastatic or locally advanced disease - adverse events since Herceptin® initiation - Progression - Evaluation at M6 and M12 - chemotherapy in 1st, 2nd and 3rd lines - hormonotherapy in 1st, 2nd and 3rd lines - Progression after 1 and 2nd lines - treatment by Herceptin® in neo-adjuvant/adjuvant - treatment by Herceptin® in metastatic
Details of collected clinical data Presence of a biobank	diagnosis - neo-adjuvant treatments - adjuvant treatments - entry in metastatic or locally advanced disease - adverse events since Herceptin® initiation - Progression - Evaluation at M6 and M12 - chemotherapy in 1st, 2nd and 3rd lines - hormonotherapy in 1st, 2nd and 3rd lines - Progression after 1 and 2nd lines - treatment by Herceptin® in neo-adjuvant/adjuvant - treatment by
