

EFICARE - Transversal study on markers and risk factors associated with cardiac insufficiency in patients aged over 70 years followed in ambulatory mode

Head :Hanon Olivier

Last update : 11/01/2019 | Version : 4 | ID : 65

General	
Identification	
Detailed name	Transversal study on markers and risk factors associated with cardiac insufficiency in patients aged over 70 years followed in ambulatory mode
Sign or acronym	EFICARE
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CNIL 909001
General Aspects	
Medical area	Cardiology
Health determinants	Medicine Social and psychosocial factors
Keywords	cardiac insufficiency, risk factors of cardiac insufficiency, Senni score, MIS score
Scientific investigator(s) (Contact)	
Name of the director	Hanon
Surname	Olivier
Email	olivier.hanon@aphp.fr
Organization	AP-HP Hôpital
Collaborations	
Funding	
Funding status	Private
Details	MENARINI France

Governance of the database	
Sponsor(s) or organisation(s) responsible	MENARINI France
Organisation status	Private
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health care professionals
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	cross-sectional study in ambulatory cardiology
Database objective	
Main objective	Describe the markers and risk factors associated with cardiac insufficiency in patients aged over 70 years followed in ambulatory mode. Assess the cognitive functions using Memory Impairment Score and assess the Senni prognostic index.
Inclusion criteria	"Male or Female aged 70 years or older Having Chronic cardiac insufficiency Hospitalized for cardiac decompensation in the last 12 months"
Population type	
Age	Elderly (65 to 79 years) Great age (80 years and more)
Population covered	Sick population
Gender	Male Woman
Geography area	National

Detail of the geography area	National
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	04/2009
Date of last collection (YYYY or MM/YYYY)	11/2009
Size of the database	
Size of the database (number of individuals)	[500-1000[individuals
Details of the number of individuals	980
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Paraclinical data Biological data Administrative data
Clinical data (detail)	Direct physical measures Medical registration
Paraclinical data (detail)	ECG, Ultrasonography, BP
Biological data (detail)	BNP, NT pro-BNP, Creatinine, Natremia, Kalemia, Hemoglobin
Administrative data (detail)	level of education, marital status, place of residence
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health care consumption and services
Care consumption (detail)	Medical/paramedical consultation Medicines consumption
Procedures	
Data collection method	during cardiology consultations cardiac insufficiency, risk factors of cardiac insufficiency, Senni score, MIS score

Participant monitoring	No
Links to administrative sources	No
Promotion and access	
Promotion	
Link to the document	http://tinyurl.com/PUBMED-EFICARE
Access	
Terms of data access (charter for data provision, format of data, availability delay)	Abstracts presented at the European Days of the SFC 2011, the article currently being written
Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
