

# ALLOPULM - Prospective Cohort Study of Late Pulmonary Complications in Patients Who Received Allogeneic Hematopoietic Stem Cells Transplantation: Estimation of Incidence and Identification of Distinct Nosologic Entities

Head :Bergeron-Lafaurie Anne, APHP

Last update : 08/20/2014 | Version : 1 | ID : 60184

## General

### Identification

Detailed name  
Prospective Cohort Study of Late Pulmonary Complications in Patients Who Received Allogeneic Hematopoietic Stem Cells Transplantation: Estimation of Incidence and Identification of Distinct Nosologic Entities

Sign or acronym  
ALLOPULM

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation  
CNIL: 01/11/2005

### General Aspects

Medical area  
Cardiology  
Pneumology

Health determinants  
Climate  
Genetic  
Iatrogenic  
Intoxication  
Nutrition  
Pollution  
Social and psychosocial factors

Others (details)  
Late pulmonary complications, allogeneic hematopoietic stem cells, assessment, incidence, nosology

Keywords  
Hospitalised subjects, health system, clinical aspects, initial and progressive radiological and respiratory function, incidence

### Scientific investigator(s) (Contact)

Name of the director  
Bergeron-Lafaurie

Surname	Anne
Address	75010 PARIS
Phone	+33 (0)1 42 49 41 66
Email	anne.bergeron-lafaurie@sls.aphp.fr
Unit	APHP

## Collaborations

## Funding

Funding status Public

Details APHP

## Governance of the database

Sponsor(s) or organisation(s) responsible APHP

Organisation status Public

## Additional contact

## Main features

## Type of database

Type of database Study databases

Study databases (details) Cohort study

Database recruitment is carried out by an intermediary A selection of health institutions and services

Database recruitment is made on the basis of: Another treatment or procedure

Database recruitment is carried out as part of an interventional study No

Additional information regarding sample selection. Prospective

## Database objective

Main objective General objective - To estimate the incidence of LONIPC: Late-onset non-infectious pulmonary

complications - To characterise clinical and radiological aspects as well as initial and progressive respiratory function - To investigate factors leading to occurrence  
Secondary objective: - To estimate the incidence of LONIPC in HSCT (hematopoietic stem cell transplantation) on an unselected prospective cohort to allow a multi-centric prospective prognostic cohort study with satisfactory statistical power

Inclusion criteria

Patients who underwent a allogeneic blood stem cell transplantation and alive at 100 days

## Population type

Age

Adulthood (19 to 24 years)  
Adulthood (25 to 44 years)  
Adulthood (45 to 64 years)

Population covered

General population

Gender

Male  
Woman

Geography area

Local

French regions covered by the database

Île-de-France

Detail of the geography area

Recruitment from bone marrow transplant patients at Hôpital Saint Louis de Paris

## Data collection

### Dates

Date of first collection (YYYY or MM/YYYY)

05/2006

### Size of the database

Size of the database (number of individuals)

< 500 individuals

Details of the number of individuals

237

## Data

Database activity

Current data collection

Type of data collected

Clinical data  
Declarative data

Paraclinical data  
Biological data

Clinical data (detail) Direct physical measures  
Medical registration

Declarative data (detail) Paper self-questionnaire  
Face to face interview

Paraclinical data (detail) Imaging

Biological data (detail) Type of samples taken: FBC, platelets, liver function tests, immunophenotyping, IgE and Phadiatop, serum bank, serum electrolytes

Presence of a biobank No

Health parameters studied Health event/morbidity  
Health event/mortality  
Quality of life/health perception

## Procedures

Data collection method Self-administered questionnaire: entry from a paper questionnaire; Interviews: entry from a paper questionnaire; Clinical examinations: handwritten  
Biological analysis: handwritten

Participant monitoring Yes

Details on monitoring of participants Follow-up duration: 4 years

Links to administrative sources No
