

# ARVD - Genetic Study of Arrhythmogenic Right Ventricular Dysplasia

Head :Charron Philippe, Centre de référence, CHU Pitié-Salpêtrière, Paris

Last update : 01/01/2018 | Version : 1 | ID : 60193

## General

### Identification

Detailed name Genetic Study of Arrhythmogenic Right Ventricular Dysplasia

Sign or acronym ARVD

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation Accord CNIL, accord CPP

### General Aspects

Medical area Cardiology

Health determinants Genetic

Others (details) Right ventricular dysplasia

Keywords unscheduled hospitalisation, dysplasia, cardiomyopathy, Health episodes, death

### Scientific investigator(s) (Contact)

Name of the director Charron

Surname Philippe

Email philippe.charron@psl.aphp.fr

Unit Centre de référence, CHU Pitié-Salpêtrière, Paris

Organization Assistance Publique - Hôpitaux de

### Collaborations

### Funding

Funding status Public

Details	Programme hospitalier de recherche clinique
<b>Governance of the database</b>	
Sponsor(s) or organisation(s) responsible	Assistance Publique - Hôpitaux de Paris
Organisation status	Public
<b>Additional contact</b>	
<b>Main features</b>	
<b>Type of database</b>	
Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Diagnosis was established according to international standards including results from bi-ventricular contrast angiography scan or cardiac MRI.
<b>Database objective</b>	
Main objective	General objective: The aim of this project is to investigate the genetic and phenotypic aspects of the disease and determine the role of genetic testing in clinical practice: diagnostic and prognostic value. Secondary objective.
Inclusion criteria	All patients with ARVD regardless of age and family background. All first degree relations over 10 years old are included.
<b>Population type</b>	
Age	Childhood (6 to 13 years) Adolescence (13 to 18 years) Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	Sick population

Gender	Male Woman
Geography area	National
Detail of the geography area	Pitié Salpêtrière
<b>Data collection</b>	
<b>Dates</b>	
Date of first collection (YYYY or MM/YYYY)	2002
Date of last collection (YYYY or MM/YYYY)	2008
<b>Size of the database</b>	
Size of the database (number of individuals)	< 500 individuals
Details of the number of individuals	350 (128 familles/families)
<b>Data</b>	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data Paraclinical data
Clinical data (detail)	Direct physical measures
Declarative data (detail)	Face to face interview
Paraclinical data (detail)	Bi-ventricular angiography scan with contrast, ECG, echocardiography, ECG-HA, Holter-ECG, stress test, cardiac MRI.
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health event/mortality Others
Other (detail)	Etiology/genetics Mortality only with no Health episodes
<b>Procedures</b>	

Data collection method	-----
Participant monitoring	Yes
Details on monitoring of participants	Average follow-up: 36 months
Links to administrative sources	No
<b>Promotion and access</b>	
<b>Promotion</b>
