- Sentinelles (Monitoring) Network

Head :Hanslik Thomas, UMR S 707 Blanchon Thierry

Last update : 06/19/2012 | Version : 1 | ID : 2582

General	
Identification	
Detailed name	Sentinelles (Monitoring) Network
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CNIL 471393 (1996).
General Aspects	
Medical area	General practice Infectious diseases Psychology and psychiatry
Health determinants	Geography
Keywords	general practitioners, monitoring, surveillance
Scientific investigator(s) (Contact)	
Name of the director	Hanslik
Surname	Thomas
Address	27 rue Chaligny 75571 PARIS CEDEX 12
Email	sentinelles@u707.jussieu.fr
Unit	UMR S 707
Organization	INSERM
Name of the director	Blanchon
Surname	Thierry
Address	27 rue Chaligny 75571 PARIS CEDEX 12

Age Newborns (birth to 28 days) Infant (28 days to 2 years) Early childhood (2 to 5 years) Childhood (6 to 13 years) Adolescence (13 to 18 years) Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)	Inclusion criteria	whose situation meets the case definition for one of
Infant (28 days to 2 years) Early childhood (2 to 5 years) Childhood (6 to 13 years) Adolescence (13 to 18 years) Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)	Population type	
Population covered Sick population	Age	Infant (28 days to 2 years) Early childhood (2 to 5 years) Childhood (6 to 13 years) Adolescence (13 to 18 years) Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years)
	Population covered	Sick population

Gender	Male Woman
Geography area	National
Detail of the geography area	National and regional estimation.
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	11/1984
Size of the database	
Size of the database (number of individuals)	Greater than 20 000 individuals
Details of the number of individuals	Ongoing collection. 39,878 in 2013.
Data	
Database activity	Current data collection
Type of data collected	Clinical data Declarative data
Clinical data (detail)	Direct physical measures
Declarative data (detail)	Paper self-questionnaire
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health care consumption and services
Care consumption (detail)	Medical/paramedical consultation
Procedures	
Data collection method	Minitel (until 1999), Website and ad-hoc software. Collection of the number of observed cases and a clinical sheet for each case (specific sheet for each indicator monitored).
Participant monitoring	No
Links to administrative sources	No
Promotion and access	

Pr	om	oti	on

Access	
Terms of data access (charter for data provision, format of data, availability delay)	National and regional incidence estimates available on the website following publication (weekly). Data is downloaded directly in file, map, or graph format. Monitoring bulletins and reports. A request can be made on the website for access to more specific data.
Access to aggregated data	Free access
Access to individual data	Access on specific project only
