Organization	OFDT

Collaborations

Funding

Funding status	Public
Details	OFDT

Governance of the database

Sponsor(s) or organisation(s) responsible	Observatoire Français des Drogues et Toxicomanies (OFDT)
Organisation status	Public

Additional contact

Main features

Type of database	Study databases
Study databases (details)	Repeated cross-sectional studies (except case control studies)

Database recruitment is carried out by an intermediary	A population file
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Every 3 years, everyone present over a given period is included

Database objective

Main objective	Obtain indicators on the health and living conditions of young people.
----------------	--

-Find out the prevalence of use and starting age of use for different psychoactive substances (legal and illegal);
-Have an indication of the trends of these indicators;
-Identify the characteristics and factors associated with these behaviours.
Until 2003, assess factors such as depression and anxiety. In 2008, an anorexia/bulimia module was included.
In 2010, a module on betting and gambling was added.

Inclusion criteria

French adolescents aged 17 to 19 years-old attending the national defense and citizenship day ("Journée défense et citoyenneté" since 2010) at the time of the survey.

Population type

Age Adolescence (13 to 18 years)

Population covered General population

Pathology

Gender Male
Woman

Geography area National

Detail of the geography area France

Data collection

Dates

Date of first collection (YYYY or MM/YYYY) 2000

Size of the database

Size of the database (number of individuals) Greater than 20 000 individuals

Details of the number of individuals 40 000

Data

Database activity Current data collection

Type of data collected Declarative data

Declarative data (detail)	Paper self-questionnaire
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health care consumption and services Quality of life/health perception
Care consumption (detail)	Hospitalization Medical/paramedical consultation Medicines consumption

Procedures

Participant monitoring	No
Followed pathology	
Links to administrative sources	No
