Funding	
Funding status	Private
Details	Bristol-Myers Squibb France
Governance of the database	
Sponsor(s) or organisation(s) responsible	Bristol-Myers Squibb France (BMS)
Organisation status	Private
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	random sampling in clusters
Database objective	
Main objective	Describe the persistence of secondary prevention therapeutics, between 3 and 30 months after hospitalization for a first acute coronary syndrome (ACS), in patients monitored by general practitioners
Inclusion criteria	Patient ≥ 18 years, outpatient seen in a general practice consultation, hospitalized in 2004 or 2005

for a 1st ACS

Population type

Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
-----	---

Population covered	Sick population
--------------------	-----------------

Gender	Male Woman
--------	---------------

Geography area	National
----------------	----------

Detail of the geography area	Metropolitan France
------------------------------	---------------------

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)	2006
--	------

Date of last collection (YYYY or MM/YYYY)	2007
---	------

Size of the database

Size of the database (number of individuals)	[1000-10 000[individuals
--	---------------------------

Details of the number of individuals	5111
--------------------------------------	------

Data

Database activity	Data collection completed
-------------------	---------------------------

Type of data collected	Clinical data Biological data
------------------------	----------------------------------

Clinical data (detail)	Direct physical measures
------------------------	--------------------------

Biological data (detail)	Total cholesterol, LDL chol, HDL chol, Triglycerides, fasting glucose
--------------------------	---

Presence of a biobank	No
-----------------------	----

Health parameters studied	Health care consumption and services
---------------------------	--------------------------------------

Care consumption (detail)

Medicines consumption

Procedures

Data collection method

Paper CRF

Participant monitoring

No
