## Additional contact

## Main features

## Type of database

Type of database	Study databases
------------------	-----------------

Study databases (details)	Case control study
---------------------------	--------------------

Database recruitment is carried out by an intermediary	A selection of health institutions and services
--	---

Database recruitment is carried out as part of an interventional study	No
--	----

Additional information regarding sample selection.	All women with breech presentation delivering in one of the participating maternities were included.
--	--

## Database objective

Main objective	The purpose of this work was to report labor and birth management practices for term breech presentation in France and Belgium in 2001-2002 and to describe indications for cesarean sections (before labor, emergency situations) in breech presentations.
Inclusion criteria	woman - adult - term of pregnancy greater than or equal to 37 weeks of amenorrhea - single pregnancy
<b>Population type</b>	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years)
Population covered	General population
Gender	Woman
Geography area	International
Detail of the geography area	Mainland France and Belgium.
<b>Data collection</b>	
<b>Dates</b>	
Date of first collection (YYYY or MM/YYYY)	06/2001
Date of last collection (YYYY or MM/YYYY)	05/2002
<b>Size of the database</b>	
Size of the database (number of individuals)	[10 000-20 000[ individuals
Details of the number of individuals	- 18067 subjects - 8 105 cases (présentations du siège) - 9 962 témoins (présentations céphaliques)
<b>Data</b>	
Database activity	Data collection completed
Type of data collected	Clinical data
Clinical data (detail)	Direct physical measures
Presence of a biobank	No

Health parameters studied	Health event/morbidity Health event/mortality
---------------------------	--

## Procedures

Data collection method	Prospective collection of data in 135 maternities in France, representing 225 999 births/year and in 36 maternities in Belgium from 1 January 2002 to 31 December 2002 representing 37 195 births/year.
------------------------	---

Participant monitoring	Yes
------------------------	-----

Links to administrative sources	No
---------------------------------	----
