Additional contact

Main features

Type of database

Type of database	Health relevant administrative databases
Additional information regarding sample selection.	Selection of all childbirth records from the Sentinel network maternity wards, on a voluntary basis.

Database objective

Main objective	The objectives of the Sentinel Network, defined at its launching, were the following: - Monitoring, year after year, perinatal health indicators (indicators of recruitment, practice and results) by combining data from maternity wards participating in the network: - Providing maternity wards with a tool to evaluate their practices and results, comparing the results of the analysis realized with their own records with the Sentinel network records; - Launching multicenter studies, at one of the network members' request.
Inclusion criteria	- woman having given birth in January of each year - from one the AUDIPOG network maternity wards

Population type

Age	Newborns (birth to 28 days) Adolescence (13 to 18 years) Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years)
Population covered	General population
Pathology	
Gender	Woman
Geography area	National
Detail of the geography area	France

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)	1994

Size of the database

Size of the database (number of individuals)	Greater than 20 000 individuals
Details of the number of individuals	500 000 newborns

Data

Database activity	Current data collection
Type of data collected	Clinical data
Clinical data (detail)	Direct physical measures
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health event/mortality Health care consumption and services
Care consumption (detail)	Hospitalization Medical/paramedical consultation
Other (detail)	--

Procedures

Participant monitoring	No
Followed pathology	
Links to administrative sources	No

Promotion and access

Promotion
