

- Managing Fever in Children: A National Survey of Parents' Knowledge and Practices in France

Head :Chalumeau Martin, U953 Recherche épidémiologique en santé périnatale et santé des femmes et des enfants
Équipe/activité : Epidémiologie clinique et organisation des soins

Last update : 06/01/2018 | Version : 2 | ID : 7830

General

Identification

Detailed name Managing Fever in Children: A National Survey of Parents' Knowledge and Practices in France

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation CPP 22/09/2011- AT 128

General Aspects

Medical area Infectious diseases
Pediatrics

Keywords Children, Drug therapy, Educational attainment, Fevers, Health education and awareness, Pediatrics, Pharmacists

Scientific investigator(s) (Contact)

Name of the director Chalumeau

Surname Martin

Address 53 avenue de l'Observatoire 6ème étage 75014
PARIS

Phone +33 (0)1 42 34 55 81

Unit U953 Recherche épidémiologique en santé périnatale et santé des femmes et des enfants
Équipe/activité : Epidémiologie clinique et organisation des soins

Organization Inserm

Collaborations	
Funding	
Funding status	Private
Details	- Laboratoires Guigoz, Société française de pédiatrie, Groupe de pédiatrie générale, Groupe de recherche épidémiologiques en pédiatrie- Laboratoire Sanofi Aventis
Governance of the database	
Sponsor(s) or organisation(s) responsible	Institut National de la Santé et de la Recherche Médicale - Inserm
Organisation status	Public
Sponsor(s) or organisation(s) responsible	Assistance Publique - Hôpitaux de Paris Saint-Vincent-de-Paul AP-HP
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health care professionals
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	French general practitioners, primary care pediatricians and pharmacist included 5 consecutive patients from 1 month to 12 years old with fever for up to 48 hr who were accompanied by a family member
Database objective	
Main objective	Study parents' knowledge and practices and their determinants in managing fever symptoms in children in France as compared with current

recommendations.

Inclusion criteria	man or woman - children between 1 month and 12 years old - having fever since less than 48h
Population type	
Age	Newborns (birth to 28 days) Infant (28 days to 2 years) Early childhood (2 to 5 years) Childhood (6 to 13 years)
Population covered	Sick population
Gender	Male Woman
Geography area	National
Detail of the geography area	France
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	11/2007
Date of last collection (YYYY or MM/YYYY)	06/2008
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	6596
Data	
Database activity	Data collection completed
Type of data collected	Declarative data
Declarative data (detail)	Paper self-questionnaire
Presence of a biobank	No
Health parameters studied	Health event/morbidity
Procedures	

Data collection method	Parents completed a questionnaire about their knowledge of fever in children and their attitudes about the current fever episode. A multilevel logistic regression model was used to assess the joint effects of patient- and HP-level variables.
Participant monitoring	No
Links to administrative sources	No
Promotion and access
