Main features

Type of database

Type of database	Study databases
------------------	-----------------

Study databases (details)	Longitudinal study (except cohorts)
---------------------------	-------------------------------------

Database recruitment is carried out by an intermediary	A population file
--	-------------------

Database recruitment is carried out as part of an interventional study	No
--	----

Additional information regarding	Prospective. Other bodies active in creating this
----------------------------------	---

sample selection.	cohort: CNRS, INED Closing date for inclusion: 01/12/2005
Database objective	
Main objective	General objective: to investigate the impact of living conditions and social integration on health and health care usage. Secondary objective: to investigate territorial factors (social, urban and available services) in relation to health an health care usage.
Inclusion criteria	Voluntary French-speaking adults
Population type	
Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	General population
Gender	Male Woman
Geography area	Regional
French regions covered by the database	Île-de-France
Detail of the geography area	Paris and main inner suburbs (75, 92, 93, 94) via 50 centres
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	09/2005
Date of last collection (YYYY or MM/YYYY)	2009
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	3000

Data

Database activity Data collection completed

Type of data collected Declarative data
Administrative data

Declarative data (detail) Paper self-questionnaire
Internet self-questionnaire
Face to face interview

Presence of a biobank No

Health parameters studied Health event/morbidity
Health event/mortality
Health care consumption and services
Quality of life/health perception

Care consumption (detail) Hospitalization
Medical/paramedical consultation
Medicines consumption

Procedures

Data collection method Optical input from a paper questionnaire.

Participant monitoring Yes

Monitoring procedures Monitoring by contact with the participant (mail, e-mail, telephone etc.)
Monitoring by crossing with a medical-administrative database

Details on monitoring of participants Indefinite duration

Links to administrative sources Yes

Linked administrative sources (detail) SIG
