Main features

Type of database

Type of database Study databases

Study databases (details) Not-repeated cross-sectional studies (except case control studies)

Database recruitment is carried out by an intermediary A selection of health institutions and services

Database recruitment is made on the basis of: Medication(s) taken

Database recruitment is carried out as part of an interventional study No

Additional information regarding sample selection. The physicians participating in the study recruit the subjects to be included among the patients that they see in consultation and according to the inclusion criteria

Database objective

Main objective To describe utilisation of newly prescribed statins in French primary care

Inclusion criteria Any patient for whom a treatment with statin was initiated for at least 3 months and less than 6 months

Population type

Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
-----	---

Population covered	Sick population
--------------------	-----------------

Gender	Male Woman
--------	---------------

Geography area	National
----------------	----------

Detail of the geography area	France
------------------------------	--------

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)	2008
--	------

Date of last collection (YYYY or MM/YYYY)	2009
---	------

Size of the database

Size of the database (number of individuals)	[1000-10 000[individuals
--	---------------------------

Details of the number of individuals	2100
--------------------------------------	------

Data

Database activity	Data collection completed
-------------------	---------------------------

Type of data collected	Clinical data Biological data Administrative data
------------------------	---

Clinical data (detail)	Medical registration
------------------------	----------------------

Biological data (detail)	* Existence of one or more lipid levels and results since the beginning of the treatment* Other biological dosages since the beginning of the treatment: Transaminases, CPK
--------------------------	---

Administrative data (detail)	Age, gender
------------------------------	-------------

Presence of a biobank	No
-----------------------	----

Health parameters studied	Health care consumption and services
Care consumption (detail)	Medicines consumption
Procedures	
Participant monitoring	No
Links to administrative sources	No
Promotion and access
