R-ens 2013 - Cross-sectional study on psoriasis severity at a first consultation in dermatology and patient's socioeconomic status

Head :Mahé Emmanuel, Service de Dermatologie

Governance of the database

Last update : 06/26/2014 Version : 1 ID : 8992		
General		
Identification		
Detailed name	Cross-sectional study on psoriasis severity at a first consultation in dermatology and patient's socioeconomic status	
Sign or acronym	R-ens 2013	
General Aspects		
Health determinants	Occupation Social and psychosocial factors	
Keywords	socioeconomic characteristics, severy, care patterns.	
Scientific investigator(s) (Contact)		
Name of the director	Mahé	
Surname	Emmanuel	
Address	69 Rue du Lieutenant Colonel Prudhon, 95107 Argenteuil, France	
Email	emmanuel.mahe@ch-argenteuil.fr	
Unit	Service de Dermatologie	
Organization	Centre Hospitalier Victor Dupouy	
Collaborations		
Funding		
Funding status	Public	
Details	CHU	

Sponsor(s) or organisation(s) responsible	Centre Hospitalier Argenteuil
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Any adult consulting for the first time for psoriasis in one of the participating centers was included in
	the study.
Database objective	the study.
Database objective Main objective	Disadvantaged socioeconomic level is associated with a delay in cancer and cardiovacsular diseases care. No data is available on psoriasis. The objective of this study is to highlight a potential correlation between patient's socioeconomic profile and psoriasis severity at the first consultation in dermatology.

Detail of the geography area	France : Argenteuil, Saint-Mandé, Marseille, Reims, Clamart, Orléans, Martigues, Amiens, Auxerres, Le Mans, Paris, Vienne, Nancy, Montpellier, Pontoise, Boulogne-Billancourt.
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	01/2013
Date of last collection (YYYY or MM/YYYY)	05/2013
Size of the database	
Size of the database (number of individuals)	[500-1000[individuals
Details of the number of individuals	683
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data
Clinical data (detail)	Direct physical measures Medical registration
Details of collected clinical data	Care patterns, psoriasis severity, rheumatisms, comorbidity, smoking, body mass index, depression.
Declarative data (detail)	Face to face interview
Details of collected declarative data	Care patterns, psoriasis severity, rheumatisms, comorbidity, smoking, body mass index, depression.
Presence of a biobank	No
Health parameters studied	Health event/morbidity
Procedures	

No

Participant monitoring

Links to administrative sources	No
Promotion and access	
Promotion	
Access	
Terms of data access (charter for data provision, format of data, availability delay)	Via publications. For more information, contact the scientific investigator.
Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
