- hospitalised and presenting with acute mania pertaining to primary bipolar disorder

## Population type

Age  
Adulthood (19 to 24 years)  
Adulthood (25 to 44 years)  
Adulthood (45 to 64 years)

Population covered  
Sick population

Gender  
Male  
Woman

Geography area  
National

Detail of the geography area  
Metropolitan France

## Data collection

### Dates

Date of first collection (YYYY or MM/YYYY)  
12/2000

Date of last collection (YYYY or MM/YYYY)  
04/2002

## Size of the database

Size of the database (number of individuals)  
[1000-10 000[ individuals

Details of the number of individuals  
1,090

## Data

Database activity  
Data collection completed

Type of data collected  
Declarative data

Declarative data (detail)  
Face to face interview

Details of collected declarative data  
Manic state rating scale (MRS and Beigel-Murphy), associated depression (list of depressive symptoms, MADRS) and psychotic elements (SAPS).

Presence of a biobank  
No

Health parameters studied  
Health event/morbidity

## Health event/mortality
