## **NEPHROVIR 2 - CHILDHOOD NEPHROTIC SYNDROME (2)**

Head :Deschenes Georges, INSERM UMR699

## Last update : 08/06/2014 | Version : 1 | ID : 5128

General	
Identification	
Detailed name	CHILDHOOD NEPHROTIC SYNDROME (2)
Sign or acronym	NEPHROVIR 2
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	Accord CNIL
General Aspects	
Medical area	Urology, andrology and nephrology
Others (details)	Nephrotic syndrome
Keywords	Analysis, immuno-virological status, idiopathic, corticosteroids, B lymphocytes, health episodes, proteinuria, glucocorticoids, after-effect, immunosuppressants, Epstein Barr Virus (EBV), impact, progression, incidence, recurrence, complications
Scientific investigator(s) (Contact)	
Name of the director	Deschenes
Surname	Georges
Address	Faculté de Médecine Xavier Bichat, 16 rue Henri Huchard, 75018 Paris
Phone	+ 33 (0)1 40 03 21 42
Email	georges.deschenes@rdb.aphp.fr
Unit	INSERM UMR699
Organization	INSERM -
Collaborations	

l'allang	
Funding status	Public
Details	Direction générale de la santé DGS- Le programme hospitalier de recherche clinique PHRC (nephrovir-2) DHOS
Governance of the database	
Sponsor(s) or organisation(s) responsible	AP-HP
Organisation status	Public
Sponsor(s) or organisation(s) responsible	INSERM
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Cohort study
•	Conorestady
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out by an intermediary Database recruitment is carried out as part of an interventional study	A selection of health institutions and services No
Database recruitment is carried out by an intermediaryDatabase recruitment is carried out as part of an interventional studyAdditional information regarding sample selection.	A selection of health institutions and services No Inclusion method: Prospective Other bodies active in creating this cohort: CHU, CHG
Database recruitment is carried out by an intermediaryDatabase recruitment is carried out as part of an interventional studyAdditional information regarding sample selection.Database objective	A selection of health institutions and services No Inclusion method: Prospective Other bodies active in creating this cohort: CHU, CHG
<ul> <li>Database recruitment is carried out by an intermediary</li> <li>Database recruitment is carried out as part of an interventional study</li> <li>Additional information regarding sample selection.</li> <li>Database objective</li> <li>Main objective</li> </ul>	A selection of health institutions and services No Inclusion method: Prospective Other bodies active in creating this cohort: CHU, CHG To analyse the immuno-virological status of patients concerning Epstein Barr Virus (EBV) during the first manifestation of idiopathic nephrotic syndrome, and its impact on steroid therapy progression. A further study is proposed for the phenotypic characterisation and analysis of B lymphocytes in patients with relation to the EBV cycle.

idiopathic nephrotic syndrome defined as proteinuria higher than 50 mg/kg/day or proteinuria/creatinine higher than 0.25 g/mmol and hypoalbuminemia less than 30 g/L. Group 2: negative serology for hepatitis B and hepatitis C virus, no decrease in C3 component. Group 3: samples for hepatitis B virus, hepatitis C virus and C3 complement component serology. Children not living in Ile de France at time of first manifestation are excluded.

## Population type

Age	Newborns (birth to 28 days) Infant (28 days to 2 years) Early childhood (2 to 5 years) Childhood (6 to 13 years) Adolescence (13 to 18 years)
Population covered	Sick population
Gender	Male Woman
Geography area	Regional
French regions covered by the database	Île-de-France
Detail of the geography area	Ile de France
Data collection	
Dates	
Dates Date of first collection (YYYY or MM/YYYY)	12/2007
DatesDate of first collection (YYYY or MM/YYYY)Date of last collection (YYYY or MM/YYYY)	12/2007 06/2020
DatesDate of first collection (YYYY or MM/YYYY)Date of last collection (YYYY or MM/YYYY)Size of the database	12/2007 06/2020
DatesDate of first collection (YYYY or MM/YYYY)Date of last collection (YYYY or MM/YYYY)Size of the databaseSize of the database (number of individuals)	12/2007 06/2020 < 500 individuals

Type of data collected	Clinical data
Clinical data (detail)	Medical registration
Presence of a biobank	Yes
Contents of biobank	Whole blood Plasma DNA
Details of biobank content	Plasma bank, DNA bank, cell bank
Health parameters studied	Health event/morbidity Health event/mortality Health care consumption and services
Care consumption (detail)	Hospitalization Medical/paramedical consultation Medicines consumption
Procedures	
Data collection method	Blood samples (2.5 mL EDTA and 2 tubes of 2.4 mL ACD) collected for study during routine laboratory tests are sent to the Clinical Investigation Centre (CIC) at the Hôpital Robert Debré: The EDTA tube will be immediately forwarded to the pharmacology laboratory for plasma collection and DNA extraction before aliquoting and freezing with further genetic study. Self-administered questionnaire: From paper questionnaire (Manual input)
Participant monitoring	Yes
Details on monitoring of participants	Follow-up duration: 10 years
Links to administrative sources	No
Promotion and access	
Promotion	
Access	
Terms of data access (charter for data provision, format of data, availability delay)	Data may be used by industrial teams. Contractual access. Data may not be used by industrial teams.
Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
