Age Childhood (6 to 13 years)

Population covered General population

Gender Male
Woman

Geography area National

Detail of the geography area Metropolitan France

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)	10/2007
--	---------

Date of last collection (YYYY or MM/YYYY)	11/2007
---	---------

Size of the database

Size of the database (number of individuals)	[1000-10 000[individuals
--	---------------------------

Details of the number of individuals	8177
--------------------------------------	------

Data

Database activity	Data collection completed
-------------------	---------------------------

Type of data collected	Declarative data
------------------------	------------------

Declarative data (detail)	Face to face interview
---------------------------	------------------------

Presence of a biobank	No
-----------------------	----

Health parameters studied	Health event/morbidity
---------------------------	------------------------

Procedures

Data collection method	Data collection was carried out face to face at home by INSEE researchers. Average length of interviews: 1 hour.
------------------------	--

Classifications used	Classification of professions into socioprofessional categories (2 positions)
----------------------	---

Participant monitoring	No
------------------------	----

Links to administrative sources	No
---------------------------------	----
