

# CARDIORENAL - Longitudinal observational study on cardiovascular and renal risk in patients with hypertension and at high CV risk

Head :Herrmann Marie-Annick, Bristol-Myers Squibb  
Schmidely Nathalie, Bristol-Myers Squibb

Last update : 09/05/2017 | Version : 1 | ID : 130

## General

### Identification

Detailed name Longitudinal observational study on cardiovascular and renal risk in patients with hypertension and at high CV risk

Sign or acronym CARDIORENAL

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation CNIL N°903103

### General Aspects

Medical area Cardiology  
Neurology  
Urology, andrology and nephrology

Health determinants Genetic  
Social and psychosocial factors

Others (details) Myocardial infarction, stroke, cardiovascular death

Keywords High-risk patients, cardiovascular event, monitoring

### Scientific investigator(s) (Contact)

Name of the director Herrmann

Surname Marie-Annick

Address 3 RUE JOSEPH MONIER 92500 RUEIL-MALMAISON

Phone +33 (1) 58 83 60 00

Email marie-annick.herrmann@bms.com

Unit Bristol-Myers Squibb

Name of the director	Schmidely
Surname	Nathalie
Address	3 RUE JOSEPH MONIER 92500 RUEIL-MALMAISON
Phone	+33 (1) 58 83 60 00
Email	nathalie.schmidely@bms.com
Unit	Bristol-Myers Squibb

## Collaborations

## Funding

Funding status Private

Details Bristol-Myers Squibb France / Sanofi-Aventis France

## Governance of the database

Sponsor(s) or organisation(s) responsible Bristol-Myers Squibb France (BMS)

Sponsor(s) or organisation(s) responsible Sanofi Aventis

Organisation status Private

## Additional contact

## Main features

## Type of database

Type of database Study databases

Study databases (details) Cohort study

Database recruitment is carried out by an intermediary A selection of health institutions and services

Database recruitment is carried out as part of an interventional study No

Additional information regarding sample selection. Random sampling in clusters

## Database objective

Main objective Evaluate, over a cohort of patients with a high cardiovascular risk according to the ANAES definition and monitored by a general practitioner, the incidence of the major cardiovascular event (MI, CVA and cardiovascular death) according to the various sub-classes of risks defined by ANAES in the "high risk" level

Inclusion criteria M/F  $\geq 18$  years, examined in ambulatory consultation by general practitioners and cardiologists, having a treated essential HBP, or such that SBP/DBP  $> 140/90$  mmHg in the absence of treatment, monitored in a normal manner by the investigating doctor

## Population type

Age Adulthood (19 to 24 years)  
Adulthood (25 to 44 years)  
Adulthood (45 to 64 years)  
Elderly (65 to 79 years)  
Great age (80 years and more)

Population covered Sick population

Gender Male  
Woman

Geography area National

Detail of the geography area Metropolitan France

## Data collection

### Dates

Date of first collection (YYYY or MM/YYYY) 2003

Date of last collection (YYYY or MM/YYYY) 2007

### Size of the database

Size of the database (number of individuals) [10 000-20 000[ individuals

Details of the number of individuals 16600

## Data

Database activity	Data collection completed
Type of data collected	Clinical data
Clinical data (detail)	Direct physical measures
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health event/mortality Health care consumption and services
Care consumption (detail)	Hospitalization Medical/paramedical consultation Medicines consumption
<b>Procedures</b>	
Data collection method	Paper observation notebook
Participant monitoring	Yes
Details on monitoring of participants	Y1, Y2, Y3
Links to administrative sources	No
<b>Promotion and access</b>	
<b>Promotion</b>	
<b>Access</b>	
Terms of data access (charter for data provision, format of data, availability delay)	Publications
Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
