### Collaborations

Funding	
Funding status	Public
Details	INSEE
Governance of the database	
Sponsor(s) or organisation(s) responsible	INSEE - Institut national de la statistique et des études économiques
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A population file
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Two-stage random selection based on the framework from the annual census survey of 2006. The national sample includes 90,000 principal dwellings. Departmental extensions were derived independently from the national sample: North (10,126), Pas de Calais (8,698) Rhône (8,745) Hauts de Seine (10,874)
Database objective	
Main objective	The objective is to provide a sample household survey on disability and health. It shall therefore help identify people likely to experience health problems and situations of disability or dependence, in order to over-represent in the health disability survey, a survey seeking to obtain a more precise and detailed knowledge of these issues.
Inclusion criteria	Individuals of all ages from ordinary households.
