	Medical registration
Declarative data (detail)	Face to face interview
Biological data (detail)	Type of samples taken: maternal blood, cord blood, blood from infants at 3 months, breast milk at birth and at 3 months, infant urine.
Presence of a biobank	Yes
Contents of biobank	Whole blood Serum Plasma DNA
Details of biobank content	Serum bank, plasma bank, DNA bank, whole blood
Health parameters studied	Health event/morbidity Health event/mortality
Procedures	
Data collection method	Self-administered questionnaire: direct input Interview: manual input and double entry Clinical Examinations: manual input and double entry Biological analysis: direct input
Participant monitoring	Yes
Tarticipante monitoring	163
