Main features

Type of database

Type of database Study databases

Study databases (details) Longitudinal study (except cohorts)

Database recruitment is carried out by an intermediary A selection of health institutions and services

Database recruitment is made on the basis of: Another treatment or procedure

Database recruitment is carried out as part of an interventional study No

Additional information regarding sample selection. Prospective Closing date for inclusion not determined:

Database objective

Main objective To assess treatment outcome (by medical, surgical

and physiotherapy treatment) for patients with anal incontinence included in the ORALIA cohort and to measure any observed improvement to symptoms and quality of life. Secondary objectives: - to study the development of associated perineal disorders: constipation, urinary incontinence, sexual issues, - to estimate treatment costs proposed to patients based on their measured impact.

| | |
|--|---|
| Inclusion criteria | Anal incontinence: Wexner score greater than 5/20 |
| Population type | |
| Age | Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more) |
| Population covered | Sick population |
| Gender | Male Woman |
| Geography area | Regional |
| French regions covered by the database | Auvergne Rhône-Alpes |
| Detail of the geography area | Rhône Alpes |
| Data collection | |
| Dates | |
| Date of first collection (YYYY or MM/YYYY) | 10/2002 |
| Size of the database | |
| Size of the database (number of individuals) | [500-1000[individuals |
| Details of the number of individuals | 621 |
| Data | |
| Database activity | Data collection completed |
| Type of data collected | Clinical data Declarative data Paraclinical data |

| | |
|----------------------------|---|
| Clinical data (detail) | Direct physical measures Medical registration |
| Declarative data (detail) | Paper self-questionnaire Face to face interview Phone interview |
| Paraclinical data (detail) | Anorectal manometry, anal endosonography, defecography, electrophysiological exploration, pelvic MRI. |

| | |
|-----------------------|----|
| Presence of a biobank | No |
|-----------------------|----|

| | |
