Main features

Type of database

Type of database Study databases

Study databases (details) Cohort study

Database recruitment is carried out by an intermediary A population file

Database recruitment is carried out as part of an interventional study No

Additional information regarding sample selection. Prospective Inclusion cut-off date: 01/12/2007
Other bodies active in creating this cohort: MSA
188,000 included from 565,000 contacts

Database objective

Main objective General objective: To study cancer risk associated with agricultural occupational exposure according to cancer type
Secondary objective: to determine the risk of cancer in the rural population

Inclusion criteria Adults affiliated with specialised health insurance (MSA) for at least 4 years
Residing in one of the concerned 12 départements at the time of enrolment

Population type

Age
Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)
Great age (80 years and more)

Population covered
General population

Gender
Male
Woman

Geography area
National

Detail of the geography area
Multicentric cohort throughout France (12 centres).
Geographical area covered: 12 Départements:
Calvados, Côte d'Or, Doubs, Gironde, Isère, Loire Atlantique, Manche, Bas Rhin, Haut Rhin, Somme, Tarn, Vendée

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)
11/2005

Size of the database

Size of the database (number of individuals)
Greater than 20 000 individuals

Details of the number of individuals
188 000

Data

Database activity
Data collection completed

Type of data collected
Declarative data
Biological data

Declarative data (detail)
Paper self-questionnaire

Biological data (detail)
Type of samples taken: blood and urine from 800 individuals

Presence of a biobank
Yes

Contents of biobank
Serum
Fluids (saliva, urine, amniotic fluid, ?)

DNA
Others

Details of biobank content Serum bank, DNA bank, lymphocytes, urine

Health parameters studied Health event/morbidity
Health event/mortality

Procedures

Data collection method Self-administered questionnaire from a paper questionnaire (optical input) Biological analysis: handwritten with double input

Participant monitoring Yes

Details on monitoring of participants Follow-up duration: 10 years

Links to administrative sources Yes

Linked administrative sources (detail) Databases used: CépiDc, other health insurance databases, pathology registry

Promotion and access
