The investigator should include 4 patients as follows: - 2 hypertensive subjects treated for their hypertension 60 years or older - 1 hypertensive subject treated for their hypertension under the age of 60 years - 1 hypertensive subject not treated for their hypertension for at least 6 months. - Subject accepting to participate in the survey."
<b>Population type</b>	

Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
-----	---

Population covered	Sick population
--------------------	-----------------

Gender	Male Woman
--------	---------------

Geography area	National
----------------	----------

Detail of the geography area	Metropolitan France
------------------------------	---------------------

## Data collection

### Dates

Date of first collection (YYYY or MM/YYYY)	2005
--	------

Date of last collection (YYYY or MM/YYYY)	2008
---	------

### Size of the database

Size of the database (number of individuals)	[1000-10 000[ individuals
--	---------------------------

Details of the number of individuals	4800
--------------------------------------	------

### Data

Database activity	Data collection completed
-------------------	---------------------------

Type of data collected	Clinical data Declarative data
------------------------	-----------------------------------

Clinical data (detail)	Direct physical measures Medical registration
------------------------	--

Declarative data (detail)	Face to face interview
---------------------------	------------------------

Presence of a biobank	No
-----------------------	----

Health parameters studied	Health care consumption and services
---------------------------	--------------------------------------

Care consumption (detail)	Medical/paramedical consultation Medicines consumption
---------------------------	---

## Procedures

Participant monitoring No

Links to administrative sources No

## Promotion and access

### Promotion

### Access

Terms of data access (charter for data provision, format of data, availability delay) methods for accessing the database are currently being defined

Access to aggregated data Access on specific project only

Access to individual data Access on specific project only
