

POSTEPI - Management of osteoporosis and associated quality of life in post menopausal women

Head :Leclerc-Zwirn Christel, Laboratoire GSK

Last update : 01/01/2018 | Version : 1 | ID : 159

General

Identification

Detailed name Management of osteoporosis and associated quality of life in post menopausal women

Sign or acronym POSTEPI

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation

--

General Aspects

Medical area General practice
Rheumatology

Health determinants Iatrogenic

Others (details) Osteoporosis

Keywords observation, fracture, observance

Scientific investigator(s) (Contact)

Name of the director Leclerc-Zwirn

Surname Christel

Funding

Funding status Private

Details	GSK laboratory
Governance of the database	
Sponsor(s) or organisation(s) responsible	LABORATOIRE GSK
Organisation status	Private
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health care professionals A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	The list of general practitioners, rheumatologists and gynecologists who can participate in the study was established via a random drawing stratified by regions in order to ensure national representativeness of the doctors. A selection process in several waves was set up in order to obtain the required number of doctors. Throughout the entire study, the doctor completed, for all of the patients seen in consultation and having the criteria for participating in the registry, a medical questionnaire
Database objective	
Main objective	In the framework of the new screening and reimbursement conditions for osteoporosis medications, describe the profile of postmenopausal women with osteoporosis and treated for less than 6 months
Inclusion criteria	Postmenopausal women diagnosed with osteoporosis less than 6 months ago via low BMD (Femoral total T score and/or spinal average <-2.5) or on a fracture not linked to a major trauma or to a cancer and treated for less than 6 months

Population type

Age	Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
-----	---

Population covered	Sick population
--------------------	-----------------

Gender	Woman
--------	-------

Geography area	National
----------------	----------

Detail of the geography area	France
------------------------------	--------

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)	2007
--	------

Date of last collection (YYYY or MM/YYYY)	2008
---	------

Size of the database

Size of the database (number of individuals)	[1000-10 000[individuals
--	---------------------------

Details of the number of individuals	1306
--------------------------------------	------

Data

Database activity	Data collection completed
-------------------	---------------------------

Type of data collected	Clinical data Declarative data
------------------------	-----------------------------------

Clinical data (detail)	Direct physical measures Medical registration
------------------------	--

Declarative data (detail)	Paper self-questionnaire
---------------------------	--------------------------

Presence of a biobank	No
-----------------------	----

Health parameters studied	Quality of life/health perception Others
---------------------------	---

Other (detail)	observance (MMAS)
----------------	-------------------

Procedures

Data collection method	Registry, medical questionnaire and patient self-questionnaire
Participant monitoring	No
Links to administrative sources	No
Promotion and access	
Promotion	
Access	
Terms of data access (charter for data provision, format of data, availability delay)	Publications: Cortet et al. Musculoskeletal Disorder. 2011 / Huas et al. Women's Health. 2010
Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
