

# VISAT - Aging, health, work

Head :Marquie Jean-Claude, UMR 5263 CNRS

Last update : 09/07/2020 | Version : 2 | ID : 3666

## General

### Identification

Detailed name Aging, health, work

Sign or acronym VISAT

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation  
CNIL : 01/12/1995

### General Aspects

Medical area  
Neurology  
Psychology and psychiatry

Keywords Working conditions, shift work, cognitive efficiency, sleep

### Scientific investigator(s) (Contact)

Name of the director Marquie  
Surname Jean-Claude  
Address Toulouse  
Phone +33 (0)5 61 27 08 68  
Email marquie@univ-tlse2.fr  
Unit UMR 5263 CNRS  
Organization CNRS

### Collaborations

### Funding

Funding status Public

Details CNRS, CONSEIL REGIONAL MP, INSTITUT DE LA

**Governance of the database**

Sponsor(s) or organisation(s) responsible CNRS

Organisation status Public

**Additional contact****Main features****Type of database**

Type of database Study databases

Study databases (details) Longitudinal study (except cohorts)

Database recruitment is carried out by an intermediary A selection of health care professionals  
A selection of health institutions and services

Database recruitment is carried out as part of an interventional study No

Additional information regarding sample selection. Prospective

**Database objective**

Main objective Study the relation between aging, health, work, and the evolution of this relation over time (on 10 years, actually)

Inclusion criteria Age (1/4 : 32, 42, 52 and 62 years old in 1996), gender (1/2), shift work (25%)

**Population type**

Age Great age (80 years and more)

Population covered General population

Gender Male  
Woman

Geography area Regional

French regions covered by the database Aquitaine Limousin Poitou-Charentes  
Languedoc-Roussillon Midi-Pyrénées

Detail of the geography area	Midi-Pyrénées, Aquitaine, Languedoc-Roussillon
<b>Data collection</b>	
<b>Dates</b>	
Date of first collection (YYYY or MM/YYYY)	01/1996
<b>Size of the database</b>	
Size of the database (number of individuals)	[1000-10 000[ individuals
Details of the number of individuals	3237
<b>Data</b>	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data
Clinical data (detail)	Direct physical measures Medical registration
Details of collected clinical data	Clinical examination at inclusion and during the follow-up every 5 years. Information collected through the clinical examination: various health parameters, neuropsychological tests
Declarative data (detail)	Paper self-questionnaire Face to face interview
Details of collected declarative data	Clinical examination at inclusion and during the follow-up every 5 years. Information collected through the clinical examination: various health parameters, neuropsychological tests
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health event/mortality
<b>Procedures</b>	
Data collection method	Composition of the self-questionnaires: demographic characteristics, past and present work conditions, life outside work, various aspects of health. Data collected through the interview: various aspects of health. Clinical data: various health parameters, neuropsychological tests. Self-

questionnaire: filled from a paper questionnaire with double data entry. Interview: filled from a paper questionnaire. Clinical examination: handwritten step

Quality procedure(s) used

Coherence request during and after computer data entry. Internal quality audit report.

Participant monitoring

Yes

Details on monitoring of participants

10 years

Links to administrative sources

No

## Promotion and access

### Promotion
