

# GN-PROGRESS - Study of Genetic and Environmental Factors of Glomerular Nephropathy Progression

Head :Stengel Bénédicte, INSERM U1018 CENTRE DE RECHERCHE EN ÉPIDÉMIOLOGIE ET SANTÉ DES POPULATIONS  
Rossert , U780

Last update : 09/05/2017 | Version : 2 | ID : 60055

## General

### Identification

Detailed name Study of Genetic and Environmental Factors of Glomerular Nephropathy Progression

Sign or acronym GN-PROGRESS

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation Cpp (p001104), CNIL (n°901267, 04/03/2005)

### General Aspects

Medical area Urology, andrology and nephrology

Health determinants Climate  
Genetic  
Geography  
Pollution

Keywords Health episodes, renal transplantation

### Scientific investigator(s) (Contact)

Name of the director Stengel

Surname Bénédicte

Phone + 33 (0)1 45 59 50 39

Email benedicte.stengel@inserm.fr

Unit INSERM U1018 CENTRE DE RECHERCHE EN ÉPIDÉMIOLOGIE ET SANTÉ DES POPULATIONS

Organization INSERM

Name of the director Rossert

Unit	U780
Organization	INSERM
<b>Collaborations</b>	
Participation in projects, networks and consortia	Yes
<b>Funding</b>	
Funding status	Public
Details	INSERM, ministère de la recherche, ministère de l'environnement, PHRC
<b>Governance of the database</b>	
Sponsor(s) or organisation(s) responsible	AP-HP
Organisation status	Public
<b>Additional contact</b>	
<b>Main features</b>	
<b>Type of database</b>	
Type of database	Study databases
Study databases (details)	Cohort study
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Retropective Inclusion cut-off date: 01/01/2004
<b>Database objective</b>	
Main objective	To investigate genetic and environmental factors of glomerular nephropathy progression.
Inclusion criteria	IgA-type glomerulonephritis, focal and segmental hyalinosis or extramembranous glomerulopathy, having had a biopsy between 1994 and 2001

## Population type

Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years)
-----	--

Population covered	Sick population
--------------------	-----------------

Gender	Male Woman
--------	---------------

Geography area	Regional
----------------	----------

French regions covered by the database	Île-de-France
--	---------------

Detail of the geography area	Multicentric cohort throughout Paris region (12 centres)
------------------------------	--

## Data collection

### Dates

Date of first collection (YYYY or MM/YYYY)	01/2002
--	---------

Date of last collection (YYYY or MM/YYYY)	05/2004
---	---------

### Size of the database

Size of the database (number of individuals)	< 500 individuals
--	-------------------

Details of the number of individuals	356
--------------------------------------	-----

### Data

Database activity	Data collection completed
-------------------	---------------------------

Type of data collected	Declarative data Biological data
------------------------	-------------------------------------

Declarative data (detail)	Face to face interview
---------------------------	------------------------

Biological data (detail)	Type of samples taken: Blood, urine
--------------------------	-------------------------------------

Presence of a biobank	Yes
-----------------------	-----

Contents of biobank	Serum DNA
---------------------	--------------

Details of biobank content	Serum bank, DNA bank
Health parameters studied	Health event/morbidity Health event/mortality
<b>Procedures</b>	
Data collection method	Interview: from paper questionnaire (manual input) and double data entry
Participant monitoring	Yes
Links to administrative sources	Yes
Linked administrative sources (detail)	Database used: crystallographic database for people who have had a renal transplant
<b>Promotion and access</b>	
<b>Promotion</b>
