Population type	
Age	Adolescence (13 to 18 years) Adulthood (19 to 24 years) Adulthood (25 to 44 years)
Population covered	General population
Gender	Woman
Geography area	National
Detail of the geography area	Metropolitan France. Data can be exploited at the local level only inside regions having been a part of an extension of the survey : Guadeloupe, Réunion, Corse, Centre, Provence-Alpes-Côte d'Azur, Nord-Pas de Calais, Alsace, Midi-Pyrénées, and the Rhône department
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2007
Size of the database	
Size of the database (number of individuals)	[10 000-20 000[ individuals
Details of the number of individuals	About 1300 IVG surveyed (for 200 000 annual IVG, according to the SAE, annual establishment statistics
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data
Clinical data (detail)	Direct physical measures
Declarative data (detail)	Paper self-questionnaire
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health care consumption and services Others

Care consumption (detail)	Hospitalization Medical/paramedical consultation Medicines consumption
Other (detail)	Social health inequalities
<b>Procedures</b>	
Data collection method	Auto questionnaire and questionnaire filled by the doctor from the medical record.
Participant monitoring	No
Links to administrative sources	No
