

COVERTE - Young Adults Infected with HIV by Vertical Transmission or During Childhood

Head :Warszawski Josiane, Équipe: Épidémiologie de VIH et des IST

Last update : 08/05/2014 | Version : 1 | ID : 6518

General	
Identification	
Detailed name	Young Adults Infected with HIV by Vertical Transmission or During Childhood
Sign or acronym	COVERTE
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	Accord CNIL
General Aspects	
Medical area	Endocrinology and metabolism Hematology Immunology Infectious diseases
Health determinants	Nutrition
Others (details)	HIV
Keywords	vertical transmission, Infection, childhood
Scientific investigator(s) (Contact)	
Name of the director	Warszawski
Surname	Josiane
Address	82, rue du Général Leclerc 94276 Le Kremlin-Bicêtre
Phone	+33 (0)1 45 21 22 86
Email	josiane.warszawski@inserm.fr
Unit	Équipe: Épidémiologie de VIH et des IST
Organization	Institut National de la Santé et de la Recherche

Collaborations	
Funding	
Funding status	Public
Details	Agence Nationale de Recherche sur le Sida
Governance of the database	
Sponsor(s) or organisation(s) responsible	Institut National de la Santé et de la Recherche Médicale
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Case control study
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	- young people living with HIV - healthy voluntary subjects
Database objective	
Main objective	To study the outcome and transition to adulthood for young people infected by the HIV-1 or -2 virus during childhood, principally by vertical transmission.
Inclusion criteria	- Men or women - aged 18 to 25 years old
Population type	
Age	Adulthood (19 to 24 years)
Population covered	General population
Gender	Male Woman

Geography area	International
Detail of the geography area	France and Belgium
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2010
Size of the database	
Size of the database (number of individuals)	< 500 individuals
Details of the number of individuals	182
Data	
Database activity	Current data collection
Type of data collected	Clinical data Declarative data Paraclinical data
Clinical data (detail)	Direct physical measures
Declarative data (detail)	Paper self-questionnaire
Paraclinical data (detail)	- scans - photon absorptiometry - echocardiography
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health event/mortality Health care consumption and services
Care consumption (detail)	Hospitalization Medical/paramedical consultation Medicines consumption
Procedures	
Participant monitoring	Yes
Details on monitoring of participants	Annual patient follow-up is planned for a duration of 3 to 6 years.
