Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Not-repeated cross-sectional studies (except case control studies)
Database recruitment is carried out by an intermediary	A selection of health care professionals
Database recruitment is made on the basis of:	Medication(s) taken
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Recruitment through participating doctors
Database objective	
Main objective	<p>Describe the profile and the care for hypertensive patients treated with calcium channel blockers and their distribution according to the level of the cardio-vascular risk as defined by HAS (French National Authority for Health) 2005.</p> <ul style="list-style-type: none"> - Describe the distribution of the risk factors according to sub-groups of age. - Describe the profile of hypertensive patients on calcium channel blockers according to blood pressure control. - Describe the therapeutic strategy when the high blood pressure is not controlled.
Inclusion criteria	<p>Patient over the age of 18 years.</p> <ul style="list-style-type: none"> - Patient seen through routine liberal medical practice, regardless of the reason for consultation. - Hypertensive patient whether or not balanced,

treated with calcium channel blockers in monotherapy or in association.
- Patient informed of the objectives of the survey.

Population type

Age
Adulthood (19 to 24 years)
Adulthood (25 to 44 years)
Adulthood (45 to 64 years)
Elderly (65 to 79 years)
Great age (80 years and more)

Population covered
Sick population

Gender
Male
Woman

Geography area
National

Detail of the geography area
Metropolitan France

Data collection

Dates

Date of first collection (YYYY or MM/YYYY)
2007

Date of last collection (YYYY or MM/YYYY)
2008

Size of the database

Size of the database (number of individuals)
[1000-10 000[individuals

Details of the number of individuals
2767

Data

Database activity
Data collection completed

Type of data collected
Clinical data
Declarative data

Clinical data (detail)
Direct physical measures
Medical registration

Declarative data (detail)
Face to face interview

Presence of a biobank
No

Health parameters studied	Health care consumption and services
Care consumption (detail)	Medical/paramedical consultation Medicines consumption
Procedures	
Data collection method	Paper CRF
Participant monitoring	No
