Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Longitudinal study (except cohorts)
Database recruitment is carried out by an intermediary	A selection of health care professionals
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	<p>A sample of general practionners was randomly selected from a qualified sampling frame of primary care physicians (CEGEDIM national file): sending of a mailing for a call for participating on a voluntary basis.</p> <p>Selection of patients: the first 4 patients consulting the general practitioner and meeting inclusion criteria were included in the cohort.</p>
Database objective	
Main objective	Comparison response to treatment by antidepressants at 3 months in patients suffering from a major depressive episode (MDE) according to the number of prior episodes of EDM in general practice
Inclusion criteria	<ul style="list-style-type: none"> * Patient aged 18 years or older, * Patient suffering from a MDE (DSM IV criterion), * Patient for whom the physician initiates an antidepressant treatment
Population type	

Age	Adulthood (19 to 24 years) Adulthood (25 to 44 years) Adulthood (45 to 64 years) Elderly (65 to 79 years) Great age (80 years and more)
Population covered	Sick population
Gender	Male Woman
Geography area	National
Detail of the geography area	Metropolitan France
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2010
Date of last collection (YYYY or MM/YYYY)	2011
Size of the database	
Size of the database (number of individuals)	[1000-10 000[individuals
Details of the number of individuals	10334
Data	
Database activity	Data collection completed
Type of data collected	Clinical data Declarative data
Clinical data (detail)	Direct physical measures
Declarative data (detail)	Paper self-questionnaire
Presence of a biobank	No
Health parameters studied	Health event/morbidity Quality of life/health perception
Procedures	
Data collection method	The physician collects the clinical information and

gives the self-questionnaire to the patient at the time of the visit.

Participant monitoring Yes

Details on monitoring of participants 3 months
