Collaborations	
Funding	
Funding status	Mixed
Details	Région PACA, INCA, CANCEROPOLE, FDF
Governance of the database	
Sponsor(s) or organisation(s) responsible	Institut National de la Santé et de la Recherche Médicale
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Longitudinal study (except cohorts)
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Additional information regarding sample selection.	Prospective Other bodies active in creating this cohort: CMNSS, CRAM-DRSM, RSI
Database objective	
Main objective	General objective: to investigate: - the long-term quality of life and survival (5 to 10 years) of breast cancer survivors over the age of 65 within the Bouches-du-Rhône, Var and Alpes-Maritimes départements. - the weight of cancer compared with co-morbidities - body image - adherence to treatment, in particular hormonal therapy - social aid, needs and support
Inclusion criteria	Survivors of primary breast cancer aged 65 and over, diagnosed with long-term disease in the three départements involved in the study
Population type	

Age	Great age (80 years and more)
Population covered	Sick population
Gender	Woman
Geography area	Regional
French regions covered by the database	Provence - Alpes - Côte d'Azur
Detail of the geography area	Bouches-du-Rhône, Var and Alpes-Maritimes
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	01/2007
Date of last collection (YYYY or MM/YYYY)	01/2015
Size of the database	
Size of the database (number of individuals)	< 500 individuals
Details of the number of individuals	338
Data	
Database activity	Current data collection
Type of data collected	Declarative data
Declarative data (detail)	Paper self-questionnaire
Presence of a biobank	No
Health parameters studied	Quality of life/health perception
Procedures	
Data collection method	Self-administered questionnaire: input from a paper questionnaire; Clinical examinations: handwritten (manual input) with double data entry
Participant monitoring	Yes
Details on monitoring of	Follow-up duration: 5 years
