

- Registre des cardiopathies ischémiques de la communauté urbaine de Lille (registre qualifié)

Head :Amouyel Philippe, Service d'épidémiologie et Santé Publique, Inserm U1167, Université Lille Nord de France

Dallongeville Jean, Service d'épidémiologie et Santé Publique, Inserm U1167, Université Lille Nord de France

Last update : 10/29/2020 | Version : 2 | ID : 232

General	
Identification	
Detailed name	Registre des cardiopathies ischémiques de la communauté urbaine de Lille (registre qualifié)
CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	986001
General Aspects	
Medical area	Cardiology
Pathology (details)	Public Health, Epidemiology
Health determinants	Geography
Keywords	Ischemic heart diseases, myocardial infarction
Scientific investigator(s) (Contact)	
Name of the director	Amouyel
Surname	Philippe
Address	Institut Pasteur de Lille, 1 rue du Pr Calmette, 59019 Lille Cedex
Phone	+ 33 (0)3 20 87 77 10
Email	philippe.amouyel@pasteur-lille.fr
Unit	Service d'épidémiologie et Santé Publique, Inserm U1167, Université Lille Nord de France
Organization	Institut Pasteur de Lille

Name of the director	Dallongeville
Surname	Jean
Address	Institut Pasteur de Lille
Phone	+ 33 (0)3 20 87 77 10
Email	jean.dallongeville@pasteur-lille.fr
Unit	Service d'épidémiologie et Santé Publique, Inserm U1167, Université Lille Nord de France
Organization	Institut Pasteur de Lille
Collaborations	
Participation in projects, networks and consortia	Yes
Details	MONICA Project
Funding	
Funding status	Public
Details	Inserm
Governance of the database	
Sponsor(s) or organisation(s) responsible	Institut Pasteur de Lille
Organisation status	Public
Sponsor(s) or organisation(s) responsible	INSERM U1167
Organisation status	Public
Sponsor(s) or organisation(s) responsible	Université Lille Nord de France
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Morbidity registers

Additional information regarding sample selection.

Selection of subjects having the required inclusion criteria.

Several sources are used to identify cases:

- University-Hospital Centers
- Hospitals with a cardio department
- Clinics with a cardio department
- Other hospitals in or outside of CUDL
- Other clinics in or outside of CUDL
- Retirement homes, hospices
- General practitioners
- Private-practicing cardiologists
- SAMU-SMUR emergency services
- SOS-Doctors
- DDASS
- IML

Database objective

Main objective

Continuous recording of epidemiological indicators describing myocardial infarction: rate of incidence, rate of occurrence (incident cases and recurrent cases), rate of mortality, fatality rate. All of these figures are provided by sex, by year and are standardized on age.

- Use of the recorded data for developing research programs in analytical epidemiology on the environmental and genetic determinants of ischemic heart diseases.

- Design and development of specific targeted studies on issues of interest to cardiologists (acute coronary syndrome, caring for the acute phase of the disease, study of survival, etc.), Institut de Veille Sanitaire (French Institute for Public Health Surveillance) (validation of the death certificates for deaths of a coronary origin, validation of data from PMSI for myocardial infarction), regional stakeholders (population surveys on the risk factors).

- Transmission of specific information and calculations as requested by the DDASS, DRASS, and any partner that may be interested by the data on ischemic heart diseases in France.

Inclusion criteria

Definition of the recorded cases:

Category 1: Acute myocardial infarction

Category 2: Coronary death

Category 3: Sudden death (in less than 24 hours)

Category 4: Non-coronary death

Category 9: Death of undetermined origin

Population type

Age

Adulthood (25 to 44 years)

Adulthood (45 to 64 years)
Elderly (65 to 79 years)

Population covered	General population
Pathology	
Gender	Male Woman
Geography area	Local
French regions covered by the database	Nord - Pas-de-Calais Picardie
Detail of the geography area	Urban community of Lille
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	1997
Size of the database	
Size of the database (number of individuals)	[10 000-20 000[individuals
Details of the number of individuals	1997-2005: 10709 patients
Data	
Database activity	Current data collection
Type of data collected	Clinical data Administrative data
Clinical data (detail)	Direct physical measures
Administrative data (detail)	Identification data
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health event/mortality
Procedures	
Data collection method	- Active - Passive- Release letters - Arrivals listings- Medical dossiers- Arrival logbooks- Day books,

SAMU sheets

Participant monitoring	Yes
Details on monitoring of participants	Vital status
Links to administrative sources	No
