

ELCAPA - Longitudinal Study on Elderly Cancer Patients: Impact of Comprehensive Geriatric Assessment

Head :Paillaud Elena, Médecine gériatrique - Albert Chenevier

Last update : 01/01/2020 | Version : 2 | ID : 8979

General

Identification

Detailed name	Longitudinal Study on Elderly Cancer Patients: Impact of Comprehensive Geriatric Assessment
---------------	---

Sign or acronym	ELCAPA
-----------------	--------

CNIL registration number, number and date of CPP agreement, AFSSAPS (French Health Products Safety Agency) authorisation	CNIL
--	------

General Aspects

Medical area	Cancer research Geriatrics
--------------	-------------------------------

Health determinants	Lifestyle and behavior Medicine Nutrition Social and psychosocial factors
---------------------	--

Keywords	comprehensive geriatric assessment, cancer treatment, functional status, elderly people, feasibility studies, geriatrics, malnutrition, risk factors, chemotherapy
----------	--

Scientific investigator(s) (Contact)

Name of the director	Paillaud
----------------------	----------

Surname	Elena
---------	-------

Address	51 avenue du Maréchal de Lattre de 94000 Créteil
---------	--

Phone	+ (0)1 49 81 21 11
-------	--------------------

Email	elena.paillaud@ach.aphp.fr
-------	----------------------------

Unit	Médecine gériatrique - Albert Chenevier
------	---

Organization	CHU Henri Mondor, AP-HP
Collaborations	
Funding	
Funding status	Public
Details	Henri Mondor UHC, AP-HP.
Governance of the database	
Sponsor(s) or organisation(s) responsible	CHU Henri Mondor, AP-HP
Organisation status	Public
Additional contact	
Main features	
Type of database	
Type of database	Study databases
Study databases (details)	Longitudinal study (except cohorts)
Database recruitment is carried out by an intermediary	A selection of health institutions and services
Database recruitment is carried out as part of an interventional study	No
Database objective	
Main objective	The general aim of ELCAPA is to identify the impact of comprehensive geriatric assessment components on changes in planned cancer treatment, and to investigate the frequency where cancer treatment plans were not fulfilled (with reasons for non-fulfilment), as well as associated risk factors.
Inclusion criteria	Cancer patients aged 70 years and over that were referred for geriatric oncology consultation at Henri/Mondor/Paul Brousse and have undergone a comprehensive geriatric assessment (CGA).
Population type	
Age	Elderly (65 to 79 years)

Great age (80 years and more)

Population covered	Sick population
Gender	Male Woman
Geography area	National
Detail of the geography area	Metropolitan France.
Data collection	
Dates	
Date of first collection (YYYY or MM/YYYY)	2007
Date of last collection (YYYY or MM/YYYY)	2010
Size of the database	
Size of the database (number of individuals)	[500-1000[individuals
Details of the number of individuals	586
Data	
Database activity	Data collection completed
Type of data collected	Clinical data
Clinical data (detail)	Direct physical measures Medical registration
Details of collected clinical data	--
Presence of a biobank	No
Health parameters studied	Health event/morbidity Health event/mortality Health care consumption and services
Care consumption (detail)	Hospitalization Medical/paramedical consultation Medicines consumption
Procedures	

Participant monitoring	Yes
Details on monitoring of participants	Follow-up at 1 year.
Links to administrative sources	No
Promotion and access	
Promotion	
Link to the document	http://www.ncbi.nlm.nih.gov/pubmed/?term=elcapa
Description	List of publications in Pubmed
Access	
Terms of data access (charter for data provision, format of data, availability delay)	Contact the scientist in charge.
Access to aggregated data	Access on specific project only
Access to individual data	Access on specific project only
